

# NEVER FORGOTTEN

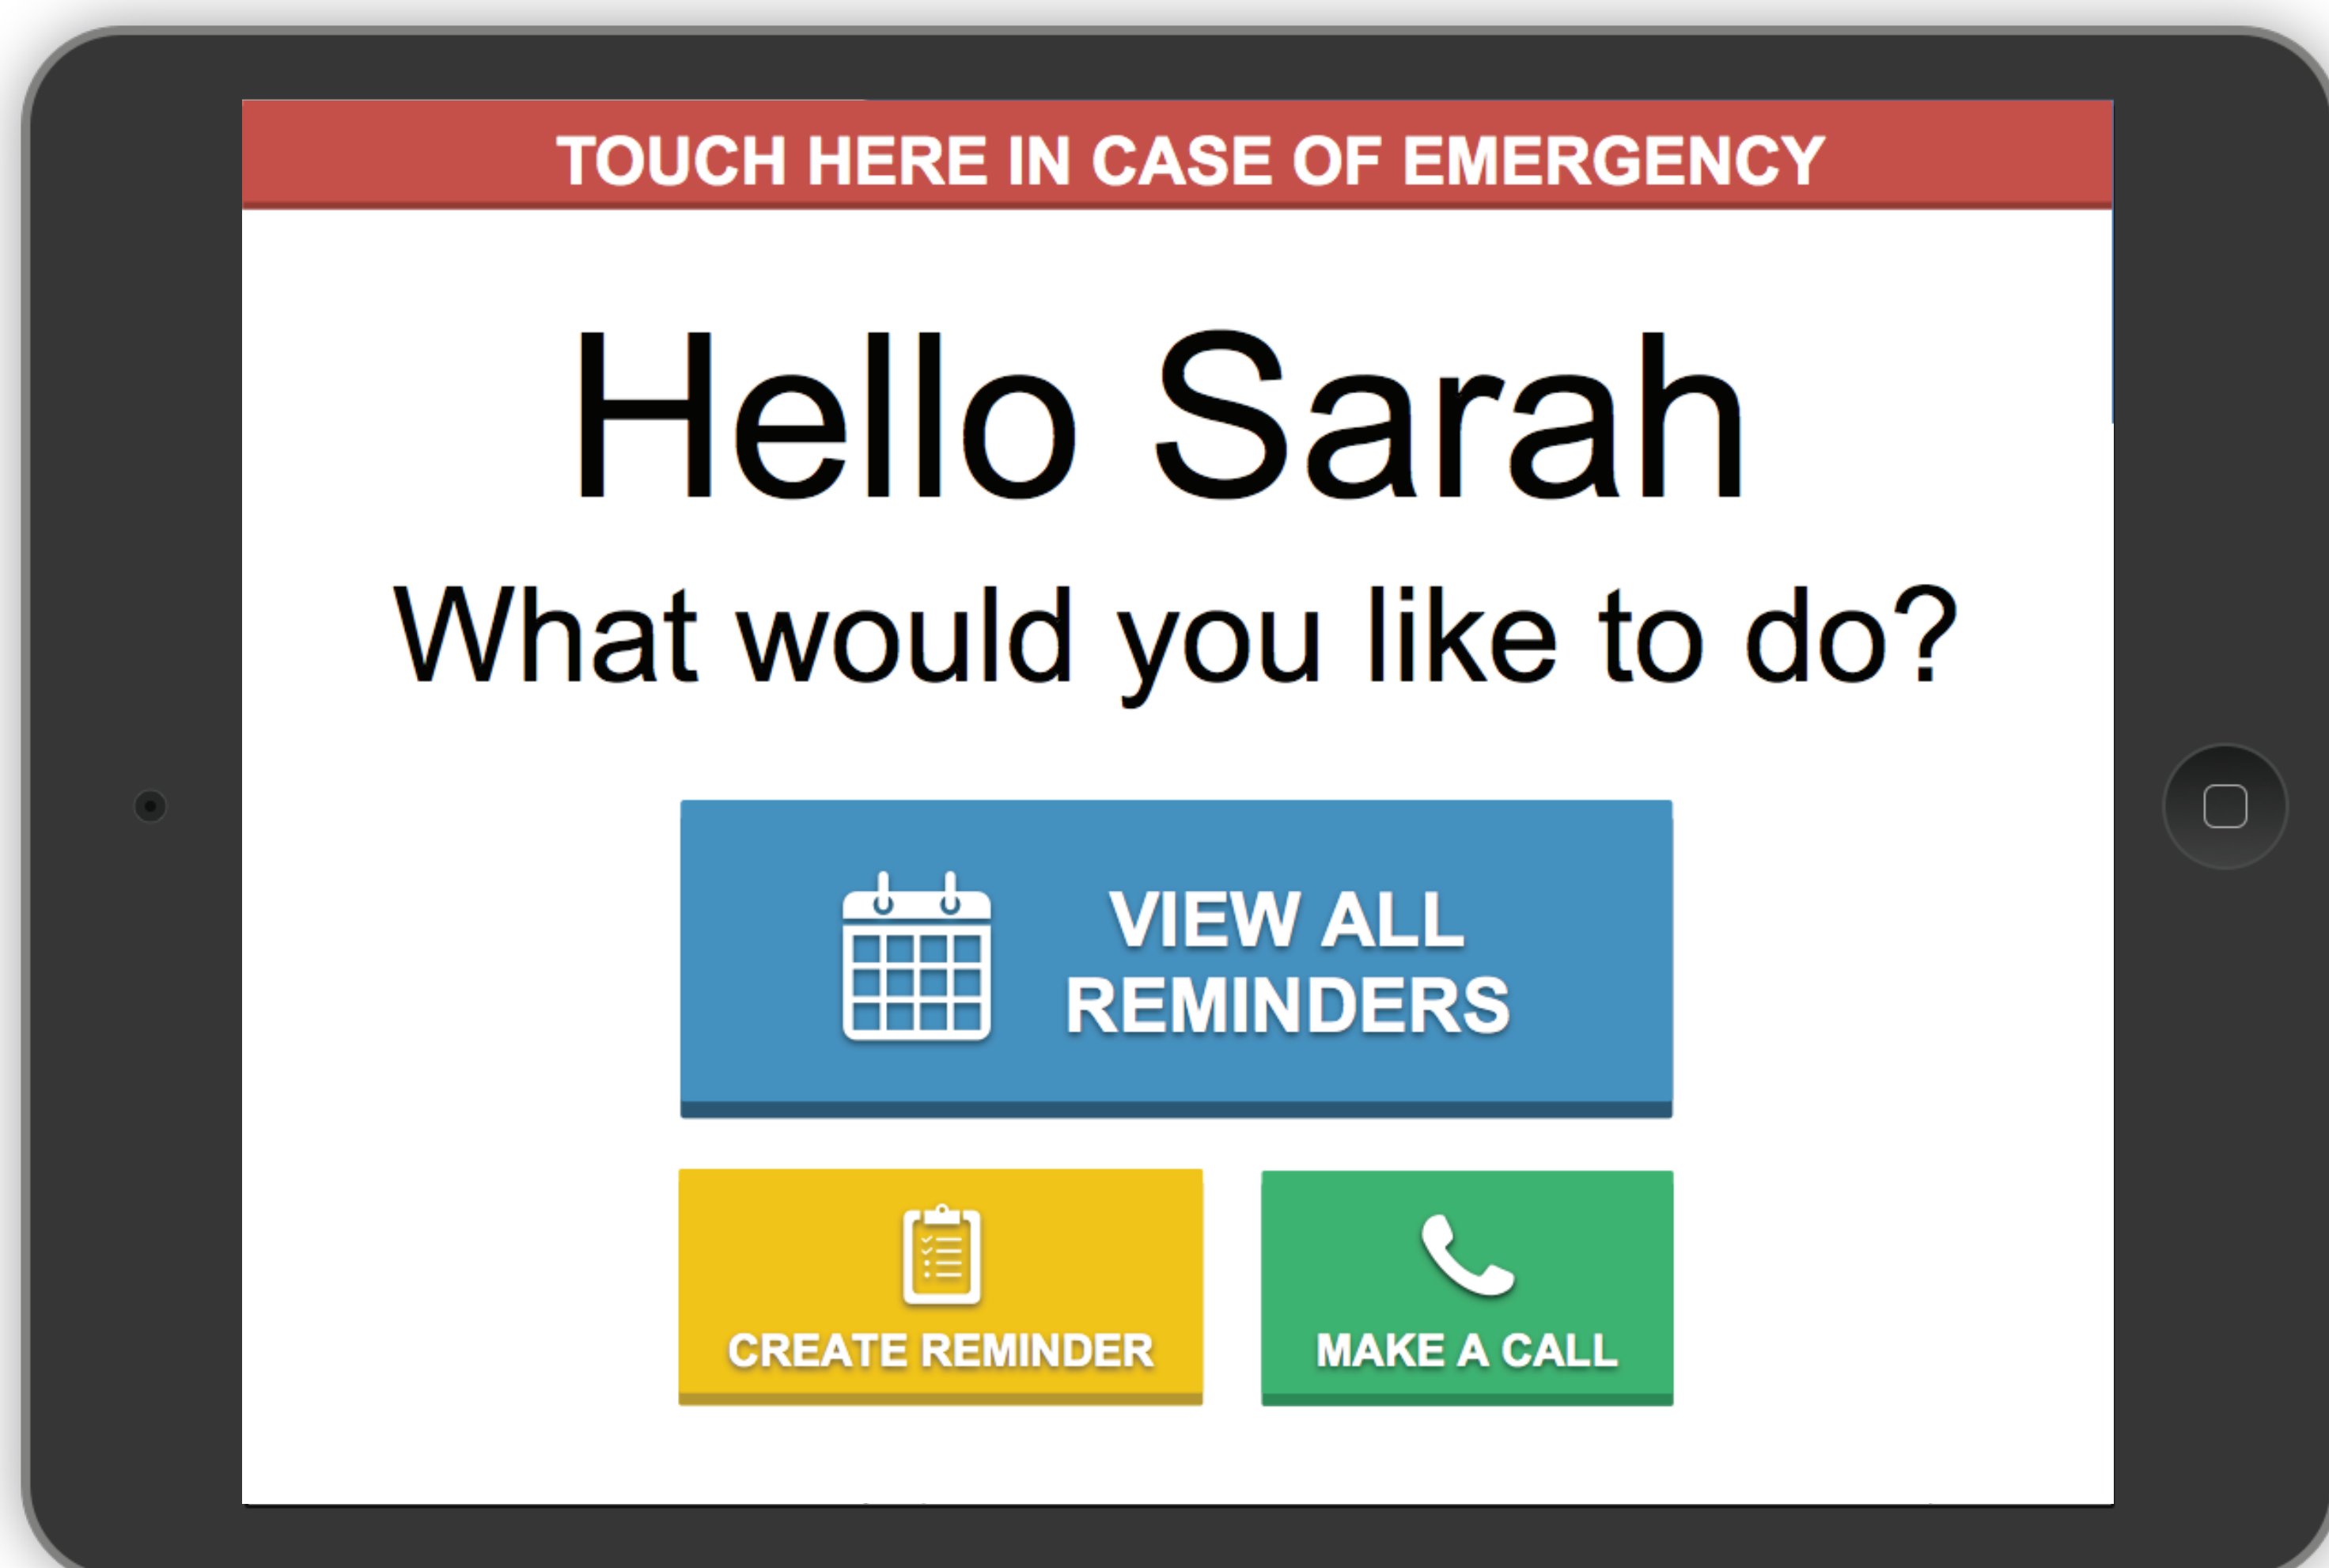

*A reminder solution for Alzheimer's*

## PROBLEM

People suffering from Alzheimer's have trouble effectively remembering events and performing daily tasks. With a heavy reliance on paper based systems, they have a hard time managing their calendar and connecting with loved ones.

*"Because people will understand, you know at my age, you tend to lose your memory. They understand, but I still feel bad."*

- Margie Chee  
Alzheimer's patient

## SOLUTION

An iPad application that serves as a central hub for reminder notifications and video calling. It is also paired with a companion application that will allow caretakers and family members to remotely view, add, and sync with the individual's calendar.

EVENT REMINDERS

EMERGENCY INFO

VIDEOCALLING

SYNCING

Family members and caretakers can help monitor and control the patient's schedule with their smartphones.
