

Enhancing the Access of Library Resources for Hospitalized Children and Teens, as well as those with Special Needs

- Feibi Wu (MLIS) 2018 -

Objective: To design an online platform for hospitalized children and teens, those with special needs who cannot go to the library, as well as their parents to connect with instructive and trustworthy staff in seeking the latest resources through the San Francisco Public Library.

Potential impacts on the target population without library resources:

- Lack of opportunities to develop literacy skills
- Feel lonely and isolated from the outside world
- Do not know where to seek information

SOLUTION

Book Checkout & Delivery Service

Fun Activities at hospitals
