STAGE

About

STAGE is the modern solution to an age old practice in the arts - producing a show. Our goal is to reduce the stress of scheduling and communication, and let you focus your energy on what really matters - getting your work on STAGE.
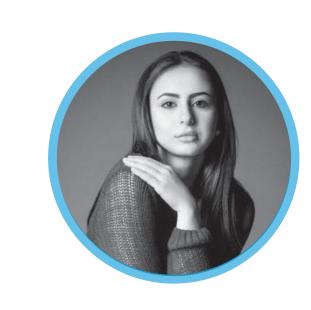

Problem Space

Currently, the Department of Dance uses an all paper-based system to audition, cast, and produce three major shows. This inefficient process results in redundant communication, stress, complications, and distracts the artists from the show.

Features

Dancers

- Create a consistent online profile
- Easily register for auditions
- Accept/decline casting

Directors

- View all casts
- Manage auditions & choreographers

Choreographers

- View dancer information
- Resolve casting conflicts
- Set rehearsal schedules
- Send casting immediately

Admin

- Create shows & auditions
- Assign roles to users
