

Explore Seattle's 20 Billion Dollar Transportation Infrastructure

TransitSphere, built in partnership with Seattle Department of Transportation (SDOT), serves as an easy, interactive way to discover how Seattle's transportation assets work together to keep us moving.

About 27% of geographic area of Seattle is transportation infrastructure

SDOT owns and maintains nearly 4,000 lane-miles of pavement.

SDOT replaces over 1,200 signs every year.

By 2025 SDOT will connect 45 miles of roads to IOT devices to help fight traffic.

Bike & Pedestrian asset class represents 27% (\$5,449M) of total \$20B replacement value.
