

DISCOVER

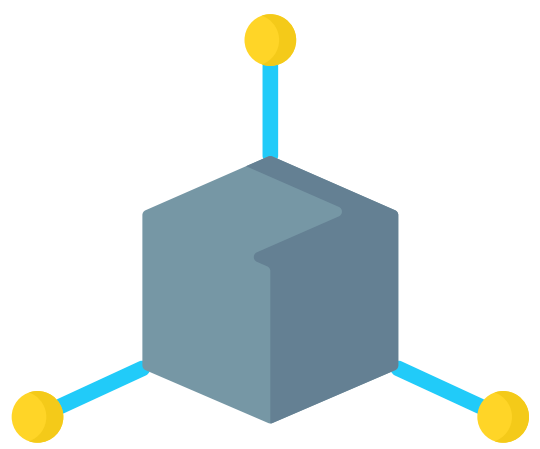

Virtualizing the physical for the world to discover.

Virtual Reality is a rapidly growing industry and technology that is not readily available to everyone. To provide accesibility, VR Archive have designed a platform to give the ability to create, share, and view virtual platforms through web browsers.

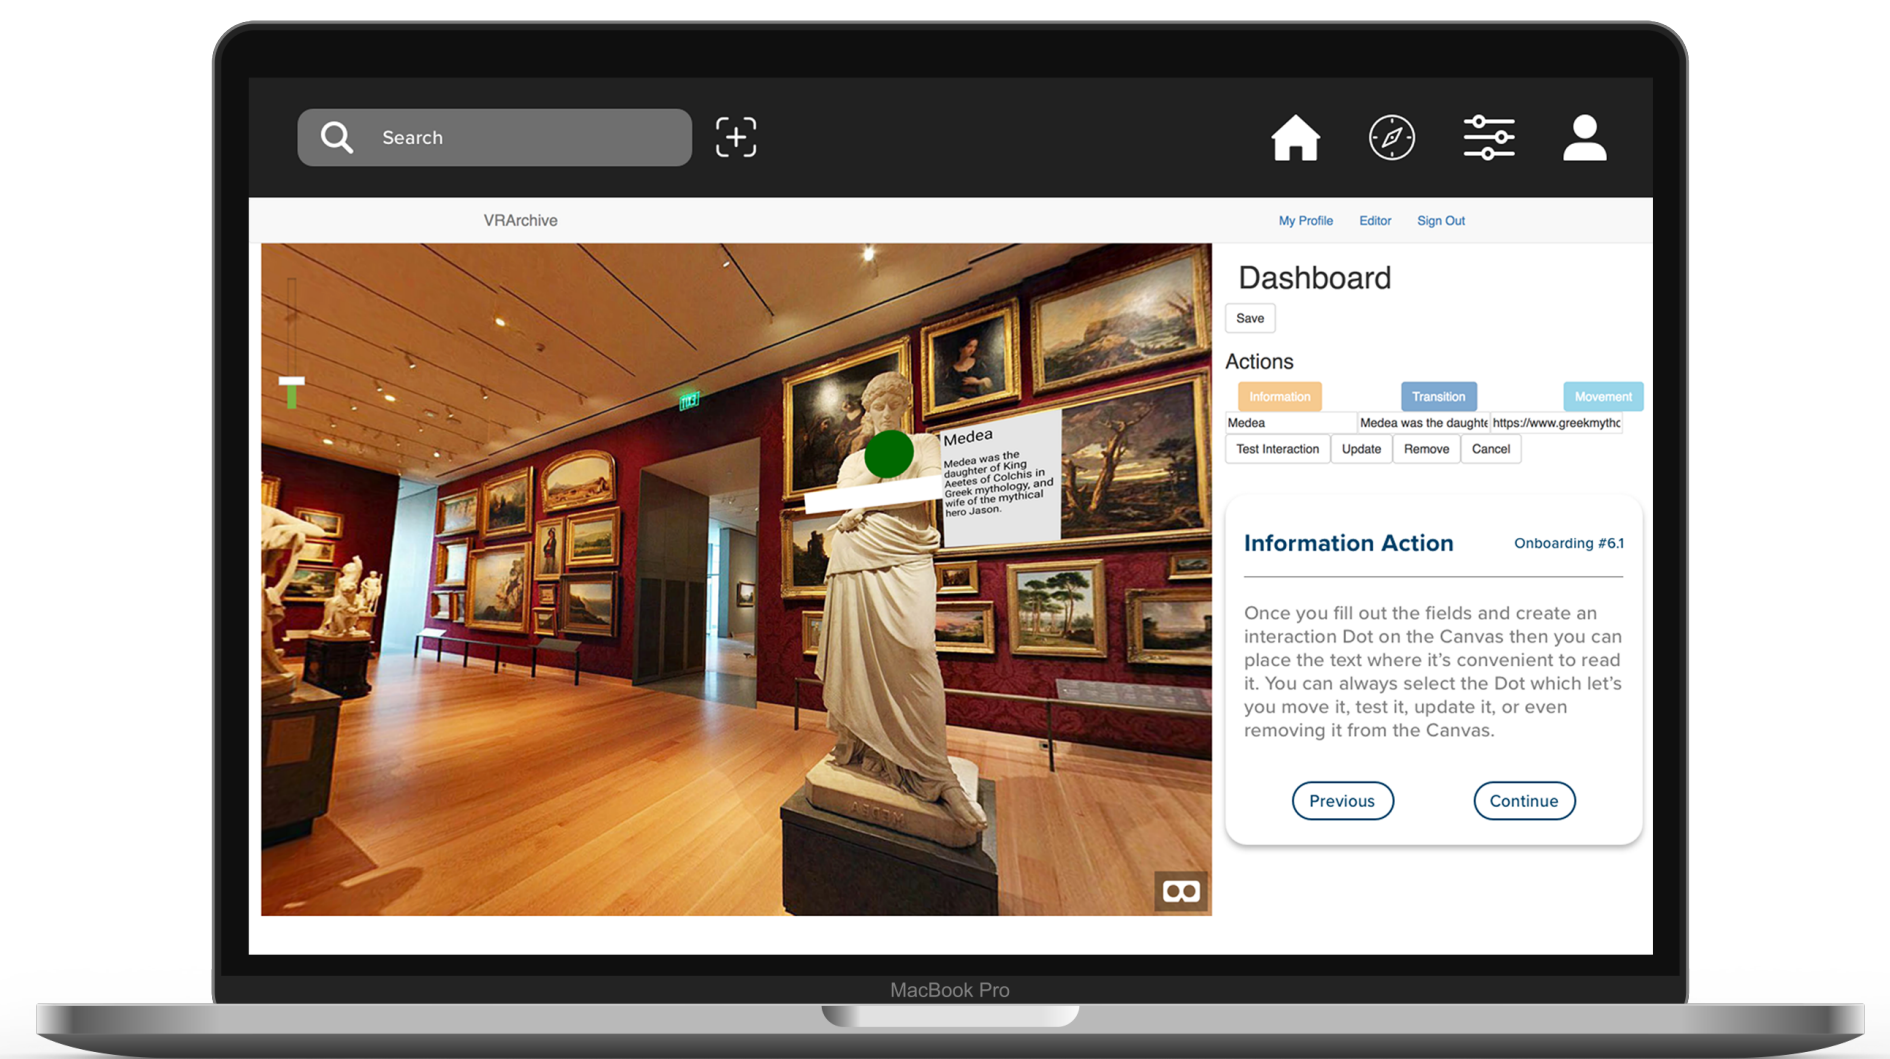

CREATOR

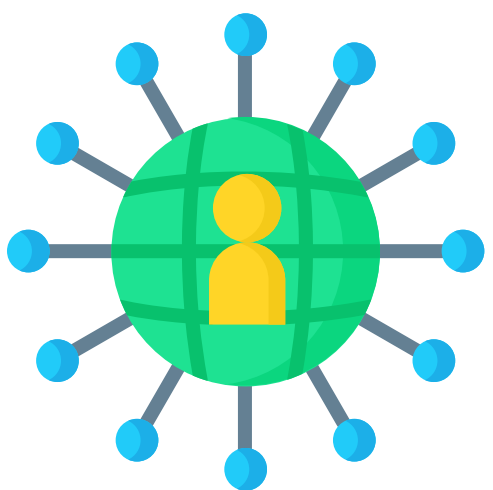

Import panoramas into your environment and start adding features such as scenes, interaction, and movements.

Utilize the Dashboard to modify an objects position, provide descripton labels, and add photospheres to broaden your museum galleries.

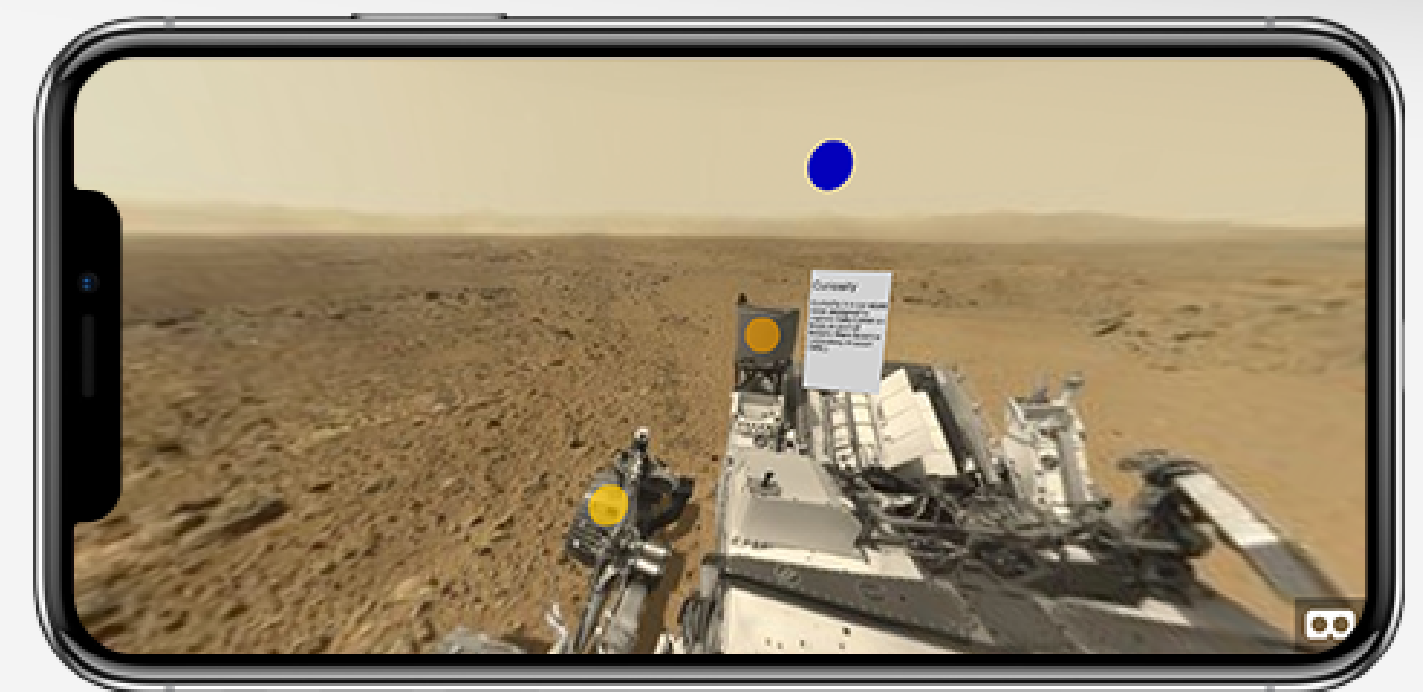

EXPLORER

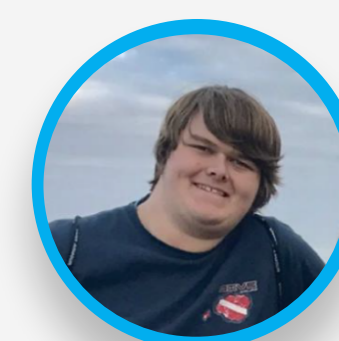

Share your museum around the world, and welcome visitors who are eager to see what kind of exhibits you have.

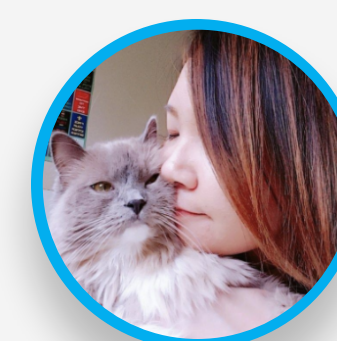

Discover new places and use this opportunity to expand your horizon by searching for museums that you are passionate about.
