### “Improving English learning around the world“

LANA was created to improve the English learning experience of students of Transcend Academy . It was developed as an all-encompassing solution that combines video conferencing, instant messaging and whiteboarding into a single web tool.

Until **LANA** the instructors at Transcend Academy used multiple services to facilitate teaching which was often irksome for the non-tech savvy users. **LANA** was developed to streamline and simplify this complex process.
