

My Visual Piano

Reintroducing creativity
Play piano with your eyes

TEAM DUBSTEP

"Approximately
15 people are
diagnosed with
ALS every day" -
alsa.org

People with physical
disabilities, such as
ALS, have trouble
expressing their
creative abilities with
music

Tobii eye tracker
captures eye
position and maps
them onto our
application

Combination of
dwell-time and
gesture-based
interactions to
play live piano
music
