# TidySpace

The inventory organization tool for hospitals and clinics

Medical tools are easy to lose

Speadsheets are inefficient + outdated

Expensive to replace tools

Flag missing or out of stock items

We helps you keep track of your inventory so you'll never lose sight of your expensive, small medical tools ever again.

Two-way User Control

One user can mark an item missing and another user can check in our system to see which items needs refilling

Quick Search for important tools

Have access to your tools, whenever you need it, and wherever you need it, during critical moments at the hospital.

Easy to set up system

Free up time from looking for tools, so that doctors and nurses can spend time on more important tasks.
