

Mirror.

A personal informatics tool that offers an easy and enjoyable way to help people self-reflect

Background

As social networking sites get extremely prevalent nowadays, they become an **indispensable part** of people's social life.

Problem

Doubtlessly, social media makes it more convenient to bond with others, it nevertheless has imperceptible effects on people—they may **raise or reduce their self-awareness** and encounter **negative social well-being and emotions**.

Learn more at lmj0328.github.io/SocialMediaReport/

Solution

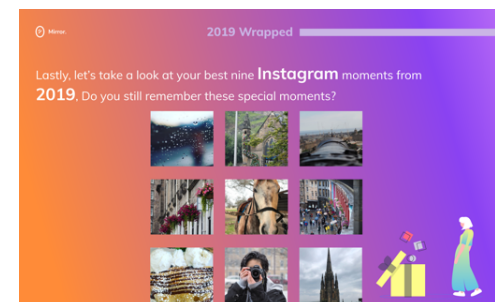

Get your monthly/annual **posting frequency** across the social media platforms you use.

Gain insights from charts that are perceptually intuitive to **reflect on things/people you care most about**.

Find out your **highlight moments** and your **precious memories** that you would like to convey to others.
