

# Ready To Save The Planet?

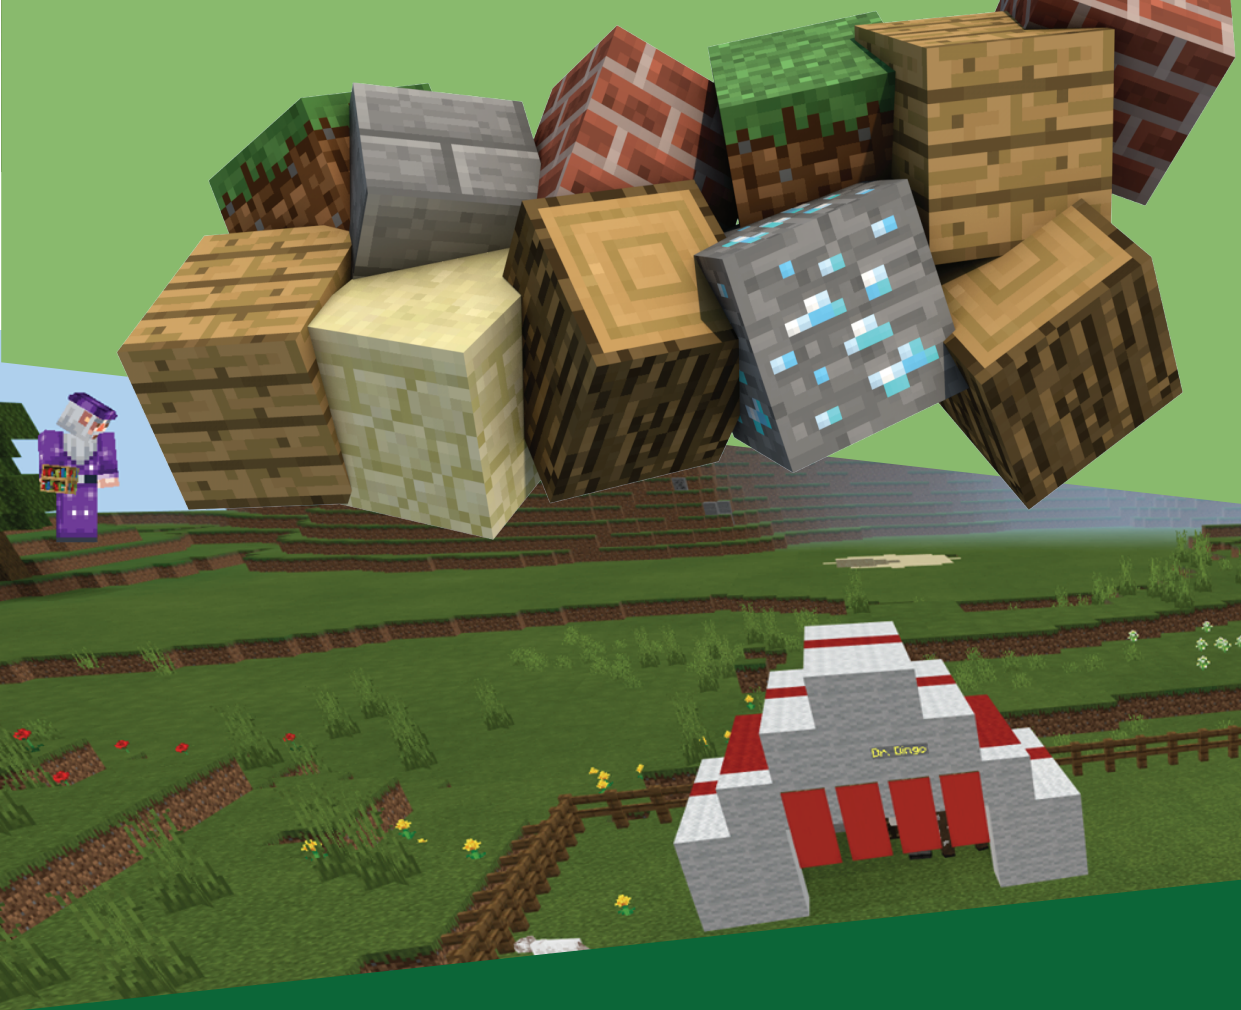

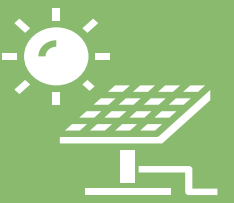

Level up your lesson plans with sustainability education in Minecraft!

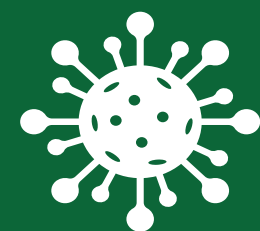

**Level 1: Reduce Pollution!**  
Tree Town's marine ecosystem desperately needs the students' help to reduce pollution.

**Level 2: Renewable Energy!**  
Students research renewable energy with interactive books and collaboratively build solar panels!

**Level 3: Fight Coronavirus!**  
Students learn how to flatten the curve for hospitals during a virus outbreak and make informed decisions for containment.
