MYDoc

Find Your Ideal Doctor in Malaysia

Doctors' information is scattered in Malaysia.

Patients rely on **word-of-mouth** or **long searches** on hospital websites to find doctors.

Doctors' **quality of service** is **not** accurately **reflected**.

Patients require efficient **access to medical information** and **connections to the right doctors**.

MYDoc aims to bridge the information gap between doctors and patients in Malaysia.

Through MYDoc, we strive to **simplify the healthcare-seeking process** for patients in Malaysia.
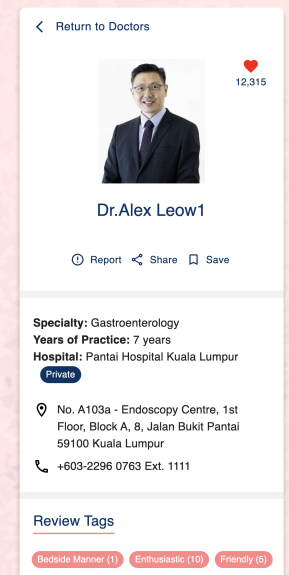

Search

Users search for doctors by specialty, by doctor or hospital name, or by condition.

Publish

Doctors publish their profile on MYDoc.

Recommend

Patients like and add review tags for doctors.
