//

### Cognitive

Alternative screen and game settings to address cognitive impairments for players.

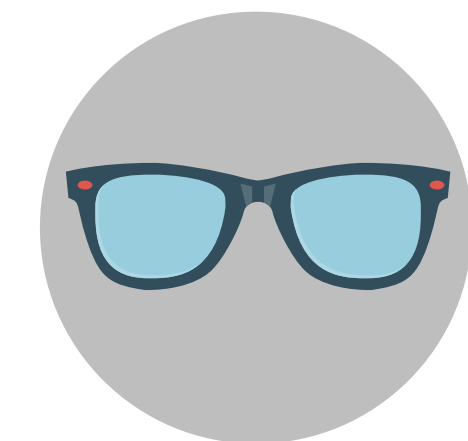

### Motor

Resources to create modified controllers designed to help those with motor impairments.

### Auditory

Create options for audio settings that accommodate those with hearing issues.

### Visual

Optional changes in screen size, color contrast, and other visual settings for those with visual disabilities.

### Our Mission

Access is a website that holds resources and solutions to help people interested in video game accessibility create more accessible games.
