

CROWDSOURCED TRANSCRIPTION FOR LADINO PHASE ONE RESEARCH

SEPHARADIC STUDIES DIGITAL LIBRARY

The SJD Sephardic Studies Digital Library Project will focus on Ladino, a language created and developed by UNESCO. These texts were generally derived from the period of the 15th-17th centuries, but also include more recent community and family narratives. The Sephardic Studies Digital Library project is a crowdsourcing initiative that allows for the transcription of these early and late Ladino histories, in addition to other documents that are not available elsewhere.

CROWDSOURCED TRANSCRIPTION FOR LADINO

The project is looking for users interested in Ladino transcription, and will be providing them with a platform to contribute to the project. The project is currently in the planning phase, and will be launching in the near future. The project is currently in the planning phase, and will be launching in the near future. The project is currently in the planning phase, and will be launching in the near future.

PHASE ONE RESEARCH

OUR SUGGESTION

What you can do:

- Transcribe the text in Ladino script.
- Provide a translation of the text into English.
- Provide a transcription of the text into Latin script.
- Provide a transcription of the text into Hebrew script.
- Provide a transcription of the text into Spanish script.
- Provide a transcription of the text into French script.
- Provide a transcription of the text into Italian script.
- Provide a transcription of the text into German script.
- Provide a transcription of the text into Russian script.
- Provide a transcription of the text into Arabic script.
- Provide a transcription of the text into Chinese script.
- Provide a transcription of the text into Japanese script.
- Provide a transcription of the text into Korean script.
- Provide a transcription of the text into Hindi script.
- Provide a transcription of the text into Bengali script.
- Provide a transcription of the text into Urdu script.
- Provide a transcription of the text into Persian script.
- Provide a transcription of the text into Turkish script.
- Provide a transcription of the text into Greek script.
- Provide a transcription of the text into Russian script.
- Provide a transcription of the text into Chinese script.
- Provide a transcription of the text into Japanese script.
- Provide a transcription of the text into Korean script.
- Provide a transcription of the text into Hindi script.
- Provide a transcription of the text into Bengali script.
- Provide a transcription of the text into Urdu script.
- Provide a transcription of the text into Persian script.
- Provide a transcription of the text into Turkish script.
- Provide a transcription of the text into Greek script.
