TACOMA COMMUNITY HOUSE LIBRARY PROJECT

Tacoma Community House is a nonprofit organization serving local community members, immigrants, and refugees through education; immigration and employment support; and crime victim advocacy. We created a library on site to support TCH clients, instructors, staff, and volunteers with supplementary educational materials as well as general reading resources in English and a variety of the clients' native languages.
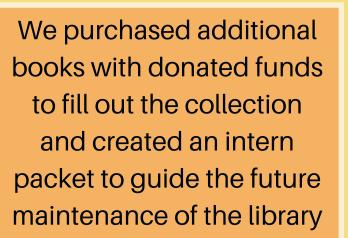

COLLECTION

We collected over 400 donated books and sorted through them to create our base collection

ORGANIZATION

We labeled and organized the books according to our collection development plan

PRESENTATION

We shelved the books and held an open house for TCH clients, instructors, staff, and volunteers

LIBRARY

We purchased additional books with donated funds to fill out the collection and created an intern packet to guide the future maintenance of the library

DASHBOARD

We designed a helpful web dashboard for the computer lab at TCH with links to resources that will aid TCH clients in learning and reaching their goals
