

## CURRENT PROBLEM

Employee scheduling is a crucial task for Seattle Public Library. To deliver core Library services through effective staff management, the library manually prepares the schedules of their employees.

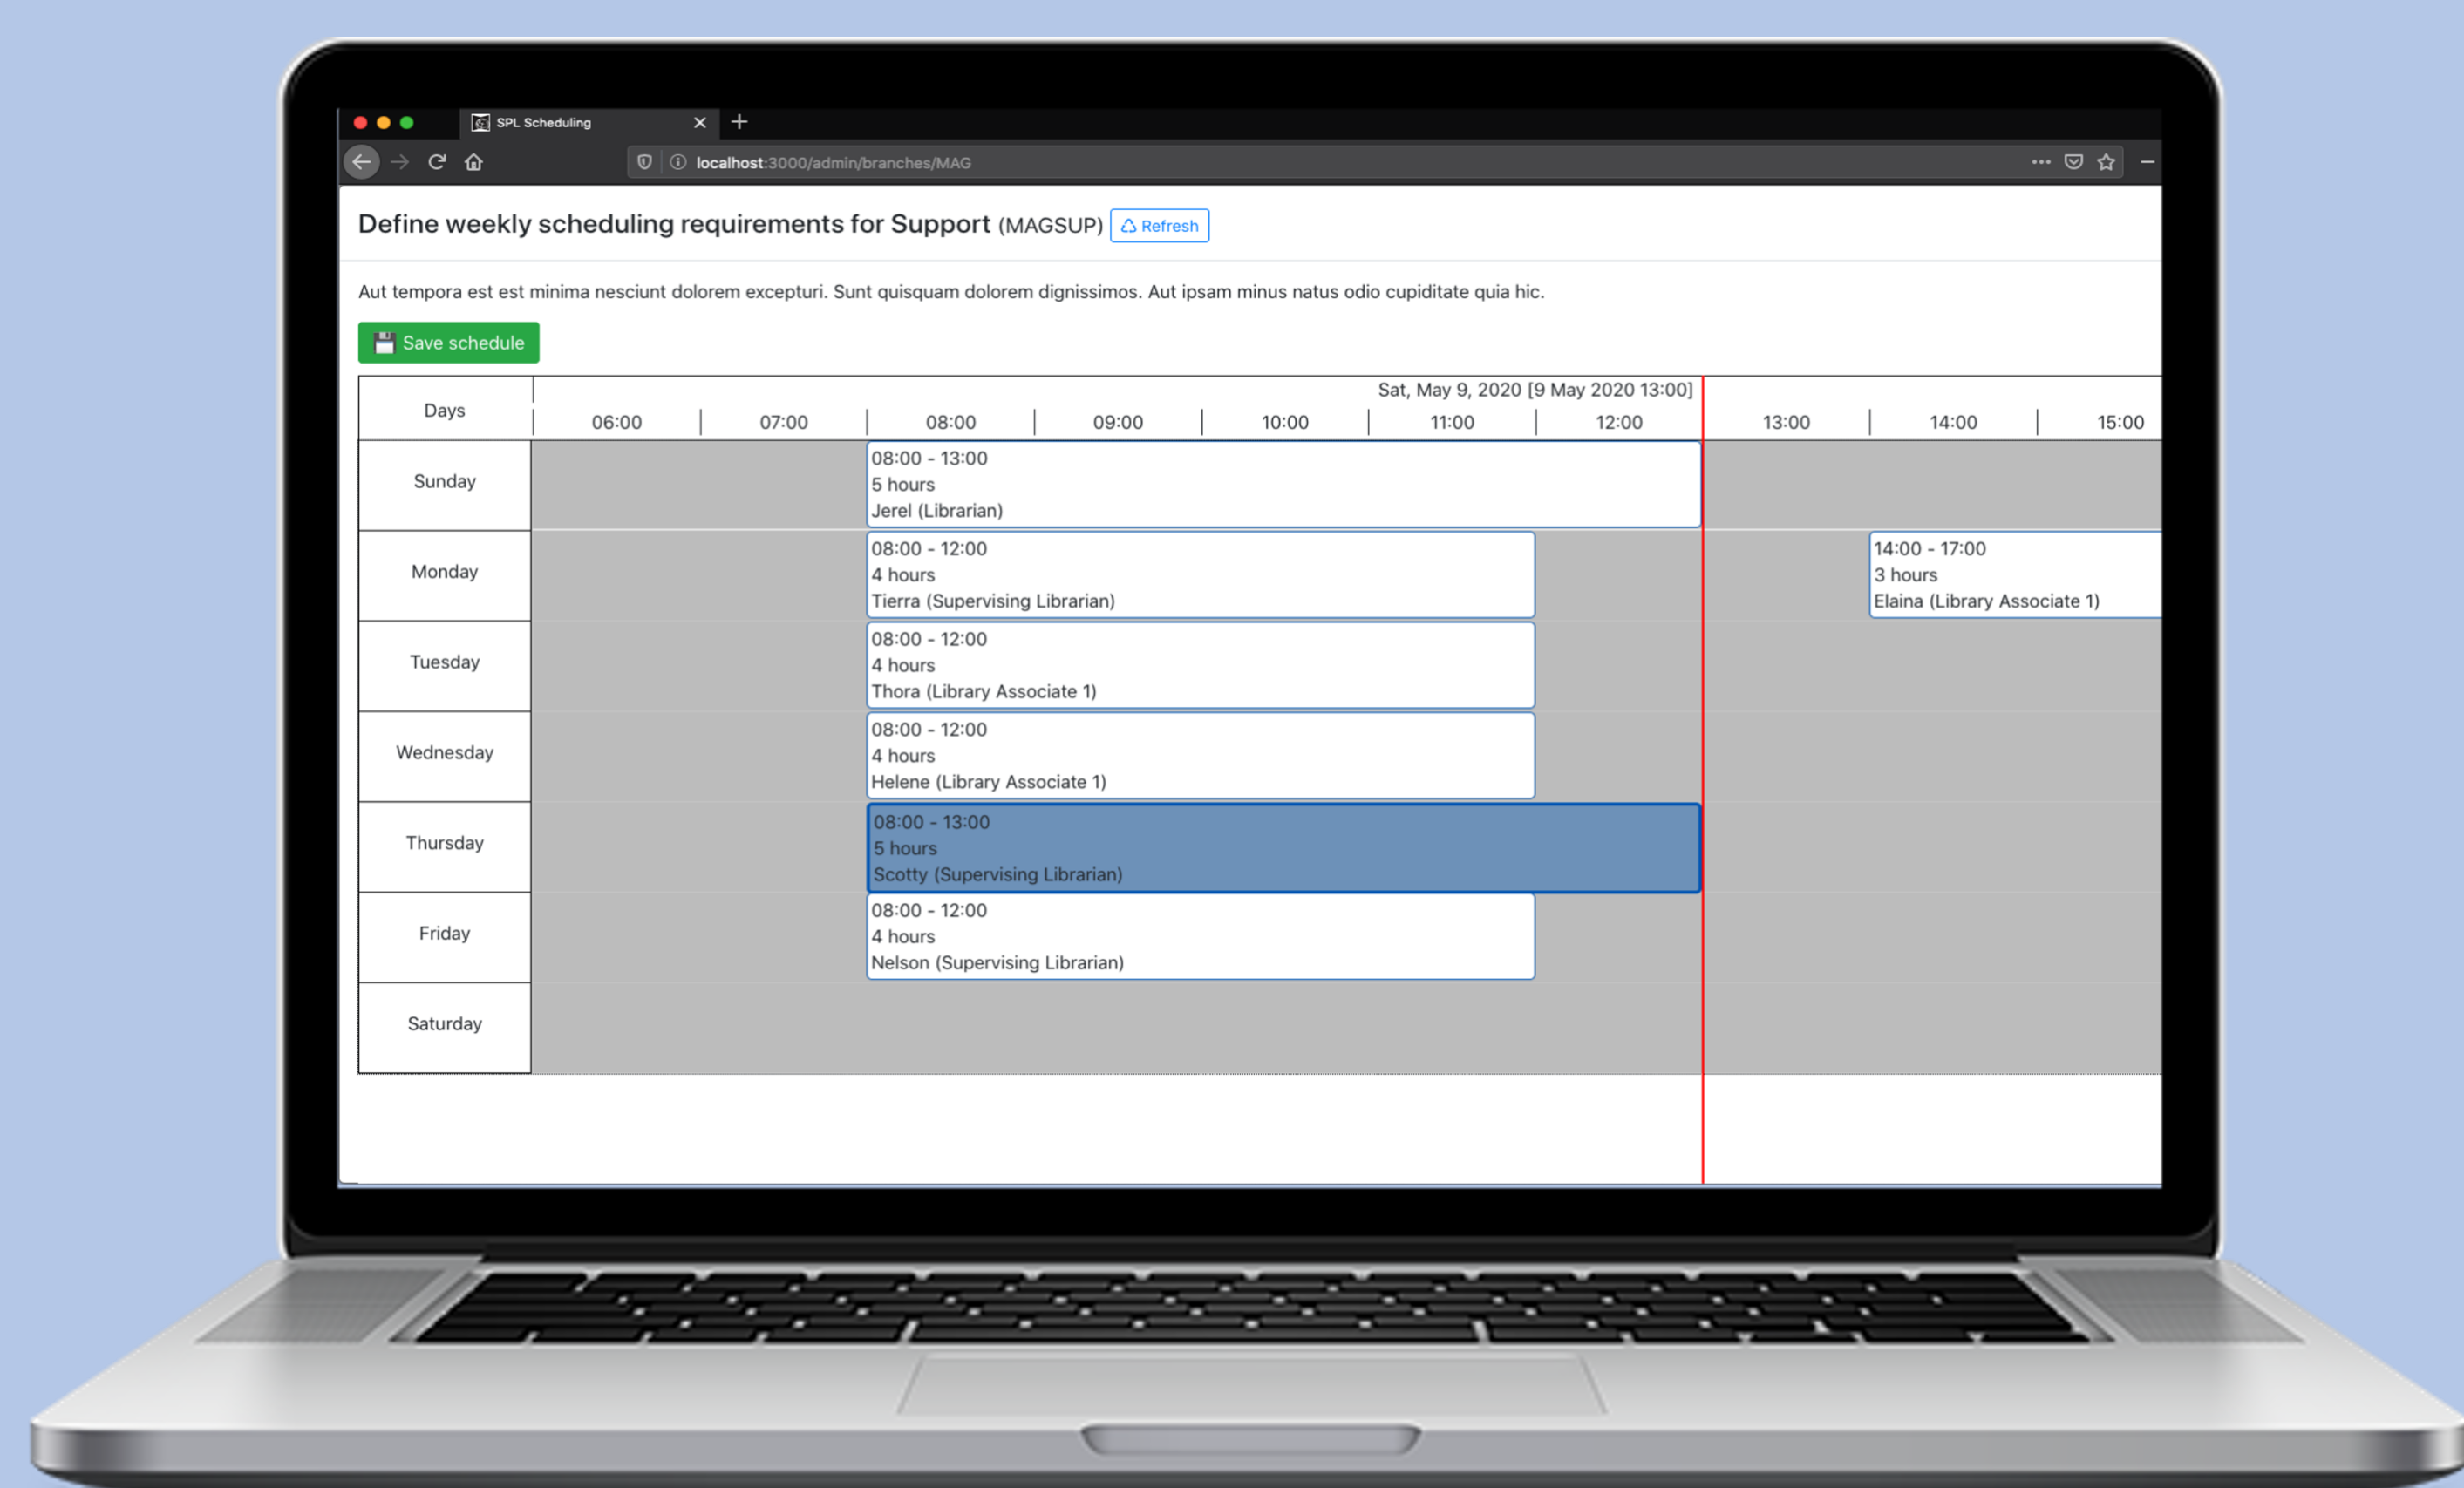

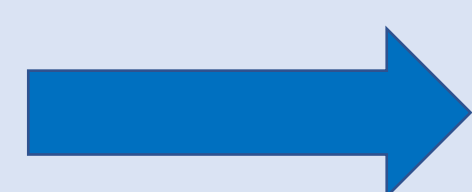

Intense coordination and teamwork needed for schedules

Extensive amount of work:  
6 regions  
26 branches  
650 employees

Ineffective platform to create and manage employee schedules

## OUR SOLUTION

An improvement from extensive manual work to a single click of the button: We built a cloud-based one-stop system that helps SPL to solve the scheduling headache.

### Functionalities of our solution for the Central Library

Create Master Schedule

System Access Management

Create Requirement Based on Business Rule

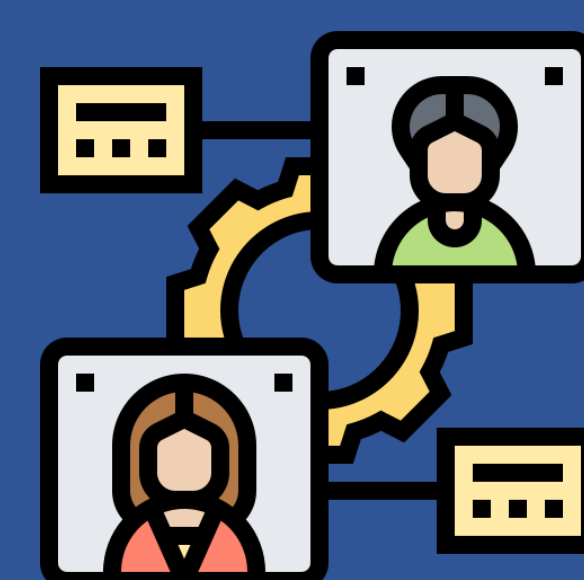

Review All Schedules

### Functionalities of our solution for the Regional Branches

Create Regional schedule

Process Daily Leave Cases

Coordinate with Other Branches

Assign Shifts Based on Availability
