

State of Education In Numbers

A **data-driven** look into school **instructional status** and **COVID-19 cases** across the nation.

56.4 %

of students felt increased stress related to school because of the pandemic. Tough decisions had to be made but families, administrators, policymakers, and researchers had no central resource for tracking decisions across the US.

DATA SOLUTION

Creating a **comprehensive** and **accessible** dataset

6800 / 10000 US school districts manually collected

Collected current and historic **school instructional status** and **COVID-19** data

Integrated with additional district datasets

Cleaned data and prepped for visualizations

Developed interactive web application

FEATURES

National View

Summary of national data

State Dashboard

State specific data dashboard
