06/11	

# and quarantine policies but also provides them with tools to manage their travel plan, guiding users through complicated procedures during the trip.

### Travel Mode

A checkbox version of the timeline for mobile format. Users can check/uncheck each action item as a way to keep track of their progress.

## Quarantine

An information page providing users with most updated quarantine policy in China and in user's destination city.

### **Quarantine Policy**

### Requirment

 Get a special one-time entry visa from an overseas Chinese Consulate Submit a health declaration prior to departure and have the QR code handy through email/print out/cell phone (which functions in China).

· Complete nucleic acid testing (NAT) within 48 days before boarding. Testing should be carried out in institutions designated or approved by Chinese embassies abroad (if already defined).

### Arrival

5 hours has

been reported.

 On landing you may need to wait on the aircraft for up to 1-2 hours while the assengers are disembarked in groups, either by name or by seat location Getting through the airport procedures may also take 3-4 hours; expect: queues showing your health declaration OR code, temperature checks, form-filling and OR

code scanning. A COVID test (NAT) will be taken from each traveler and sent for Have all your documents ready and prepare to fill in multiple forms and declarations for each person. Keep your boarding passes: you will need proof of

flights and seat numbers in coming day · Apply for home/central quarantine at the last "transportation" station

 You will then go to wait for a special bus to transfer you to your assigned hote where you will wa

for your test results. The transit to that location may take a long time, anything up to

Special Cases

Quarantine policies are assigned to different groups of people GROUP 1: Inbound travelers can complete 7 of their 14 days of quarantine at home. Travele must request 7+7 guarantine at the airport. The first 7 days must still be done at designated observation hotel site and the remaining 7 days at home, as long as the individual's home/apartment has individual entrance and individual AC. GROUP 2: Travelers meeting the following 3 conditions can apply for home quarantine in

PVG upon arrival: a) Traveling with children under 16 years old, medical letter, or other (APPENDIX 3)

b) Travelers have qualified home conditions; c) Travelers have negative COVID test results after arrival to PVG GROUP 3: Travelers with residences without individual entrance or individual AC must star 14 days at a quarantine hotel.

If your test result is positive, or if you develop symptoms during your quarantine, you will be transferred to a COVID-19 specialist hospital unit.

### After Quarantine

which will enable you to move freely around the city.

• If you do not develop any COVID-19 symptoms during your quarantine period, when the 14 days are finished, you will receive a release certificate. You may be subject to complete a final NAT before your release certificate is issued. • For those arriving after July 27, 2020 and under the new 7 days at hotel plus 7 days at

home quarantine, a final NAT test is required before release . For those staying at the central guarantine hotel, upon completion of the 14 days period

you can then arrange your transportation and go home Once you have your release certificate, you should download the Shanghai Health OR Code
