

REIMAGINING THE CAPSTONE ARCHIVE

Reshaping the current state of the iSchool Capstone archive to fully showcase the excellent reputation of the department and its industry partners.

THE CHALLENGE

Redesign a stagnant capstone experience that fails to facilitate connections with industry partners and showcase students' work beautifully.

THE OUTCOME

A clean and dynamic navigation design allows users to explore projects and have an individual project page that gives a lot of flexibility in displaying content.

THE IMPACT

Audiences and potential sponsors are able to find projects, and students are able to show projects in a richer way, which inherently improves the reputation of the iSchool by making the website accessible and more useful.

KEY FEATURES

Main Content Information
Please fill out the following information to add new main content that you want to appear on your project page. This is the place for your goals to build more connections and showcase your project!

Main Content Section 1 *
Choose a template for your Main Content Section 1 *
The user profile
