

Luggage for Learning

Creating engaging, equitable, and standards-based curriculum kits for first-grade educators.

The Problem:

There are few district-provided resources for the first-grade team to use. If resources are provided, they are frequently out-of-date or links are broken.

Our Solution:

Find diverse, equitable open-access resources and compile them into one document, split into units based on the state and district pacing guides.

Teachers and students can access the resources via an interactive website.
