

Amplify.

Empowering the World: Voice therapy anywhere and everywhere.

Problem

Communication Disorder is affecting **8%** of American Children

Our Solution

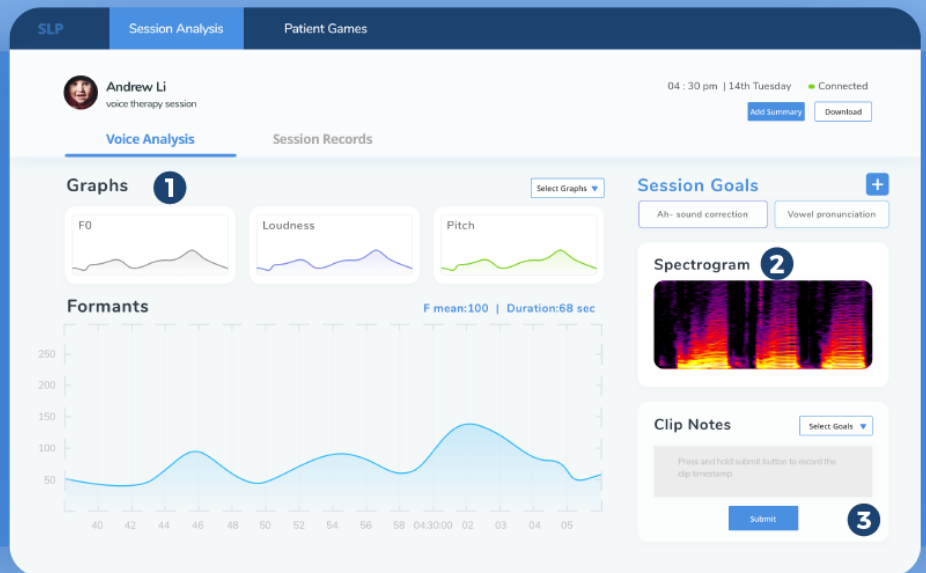

Amplify aims to solve the insufficient treatment resources to communication disorder through enabling an engaging and convenient telehealth therapy session.

Our dashboard provides three crucial features to assist therapy sessions:

Interactive Feedback

Quality Audio

Session Management

Voice Analysis ①

Real-time plots on the frequencies, harmonicities and formants

Spectrogram Graph ②

Colored Spectrogram for deep analysis on the voice frequencies

Note Entry ③

Press-and-hold timestamp and length labeled notes.
