

# IOWA

## ROCK 'N ROLL PRESERVATION PROJECT

*Celebrate the legacy and inspire the future of Rock 'n Roll in Iowa.*

In partnership with the Iowa Rock 'n Roll Music Association Hall of Fame & Museum

### GOAL

To support the Association's mission by helping record and preserve artifacts that tell the history of Iowa rock 'n roll.

### THE PROBLEM

The Association's Hall of Fame & Museum lacks the resources to store, record appropriately, and maintain artifacts within their collection. These problems create issues with accessibility, object provenance, object interpretation, and collection safety.

### THE SOLUTION

- PastPerfect cloud-based cataloging software.
- Optimized organization of collection storage space for ease of access.
- Policies and procedures created and implemented to guide present and future museum acquisitions.

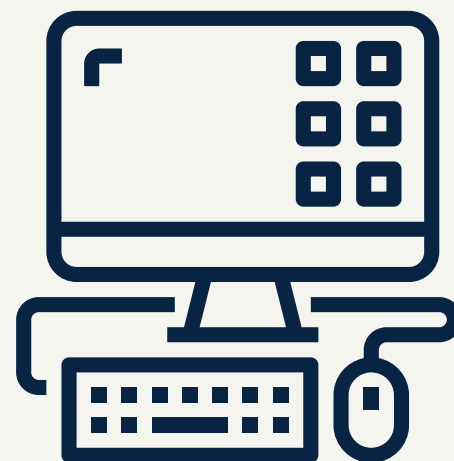

### FUTURE OUTCOMES

Collection is accessible, safe, and organized appropriately to streamline collection-related activities.

Collection-related policies and procedures exist that are consistent and strengthen the museum's collection.

PastPerfect cloud-based software is established, easy to reference, and maintained for all future collection's activities.

### THE PROCESS

Assessing the needs of the collection, with a focus on issues that require immediate attention.

Determining the best possible solutions, keeping in mind financial and physical resources.

Strategizing the most effective use of storage space and the future of the collection.

Proposing budget for necessary collection maintenance and project implementation.
