

EVALUATING FOR EQUITY

STUDENT-CENTERED TOOLS AND BEST PRACTICES FOR
MANAGING VIDEO TUTORIAL COLLECTIONS AT HOLMAN LIBRARY

Sponsored by Amanda Chin
Reference and Instruction Librarian at the
Holman Library

With guidance from Jody Segal,
Instruction Liaison Librarian at the
Holman Library

Information Need:

- **Green River College's Holman Library** is seeking tools and methods for implementing collection practices that **lead with equity**
- Design collection criteria for video tutorials & digital instruction resources

Background

Goals

- Equitable instructional materials will center students as active evaluators of authority and participants in knowledge-production
- Collections of these digital resources should be accessible, inclusive, and equitable

Why Video Tutorials?

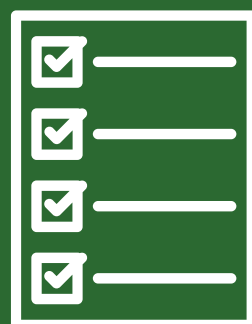

Purpose: As instructional materials, video tutorials can

- better connect students to library resources
- offer critical information literacy skills
- provide more equitable access to research tools and methods.

TOOLS & FINDINGS

Using Equity as a lens for Collection-Building

- Establish **values, frameworks, and tools** for collection building at the intersection of critical information literacy, inclusive pedagogy, and instructional design.
- Use these frameworks to support instructional faculty & **empower student users** as active participants in research and inquiry.
- Develop evaluative criteria that assess instructional resources

Evaluative Rubric

Tool for implementing equity-based criteria towards resource accessibility, inclusivity, relevancy, currency, critical information literacy, and Collection structure and design.

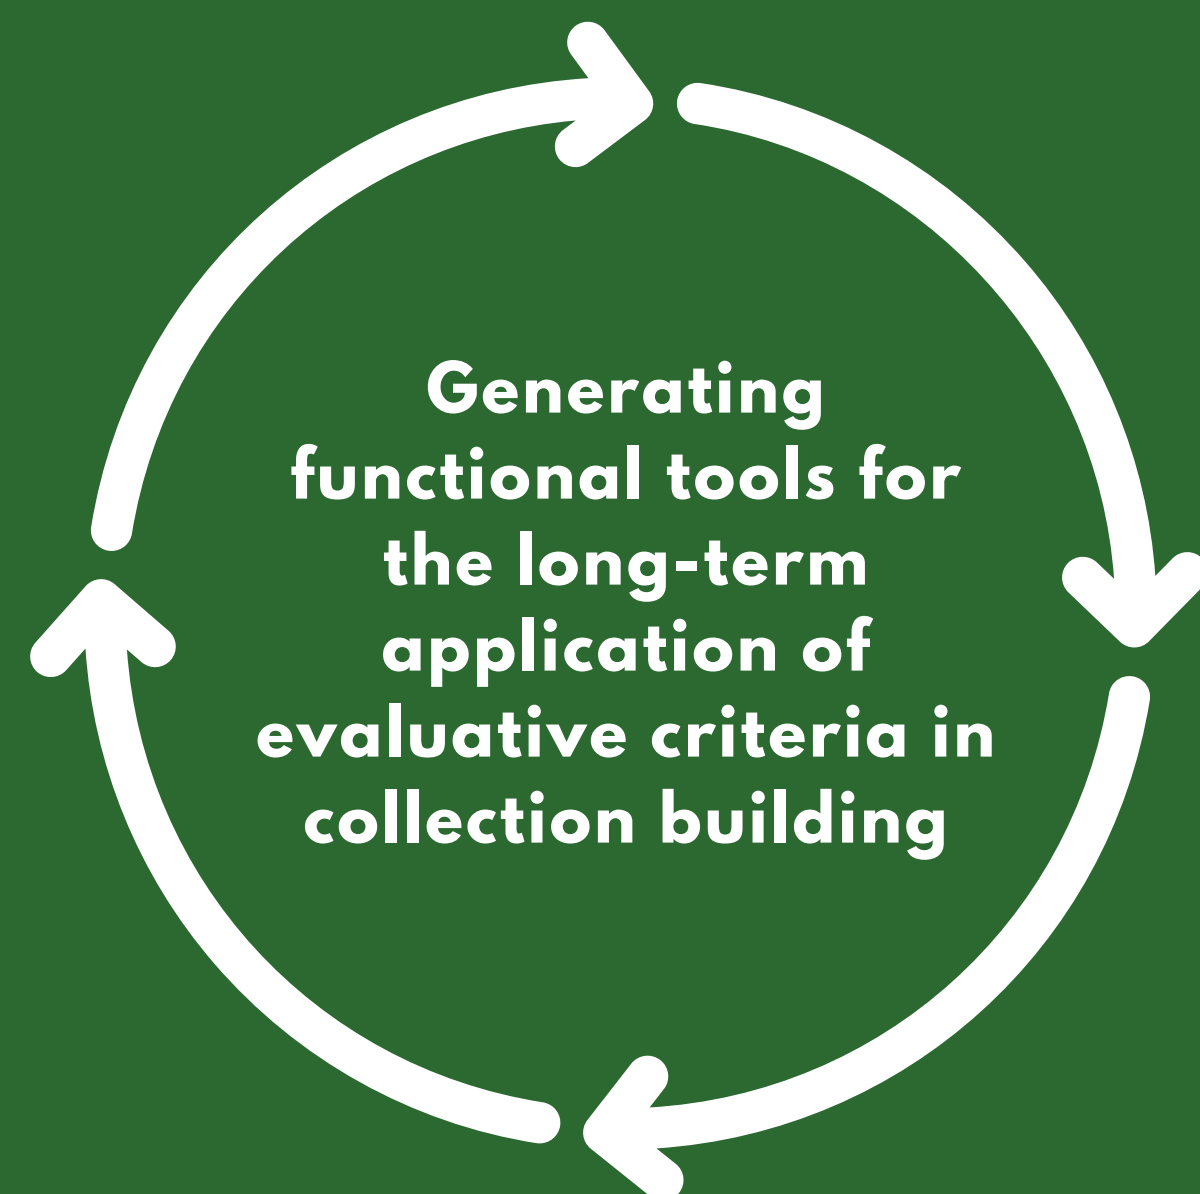

Best Practices

A collection of values and accompanying frameworks for implementing inclusive pedagogies, e-learning design strategies, and information literacy at the collection and resource-level

Controlled Vocabulary

Describing, identifying, and evaluating concrete aspects and effects of equity in video tutorials
