Type a message

Unaccompanied Alien Children (UAC) are minors that immigrate to the USA to seek improved economic, political and safe realities.

The number of UAC has increased exponentially in the last couple of years. Totaling 118,938 in 2023

44% of latino migrant youth were referred to behavioral health services

Intervention by text messaging helped teenagers be more positive (66.7%) than in the control group

What are the Key Concepts?

2:10 PM

- Clients prefer **Low-Stakes Interactions**
- They have significant **Language and Social Barriers** to access.

- Clients have **Nuanced Situations**
- The **Immigration Process is Complicated**, and often dehumanizing

- **Clients aren't Always Available** during business hours.
- KIND internal processes result in **Long Turnaround Times** of 1-2 weeks

Can you describe this round of testing?
2:10 PM

- 5 user tests with KIND paralegals
- Tested chatbot with WhatsApp integration

- Users ask chatbot about Baltimore City resources
 - I.e “where are the immigration offices in Baltimore?” or “where is the nearest hospital?”

- High satisfactory with response details + accuracy
- Improve readability of responses
- Create feature for chatbot to know when a conversation ends

What are your ethical considerations?

2:10 PM

Improve Response Turnaround:

- Streamline current processes for faster responses.
- Consider strategies for efficiency, particularly for users with limited data access.

User-Centric Design:

- Conduct a comprehensive needs assessment for diverse user groups.
- Develop a versatile solution addressing language barriers and varied immigration challenges.

Balanced Automation:

- Create an intelligent system for accurate user needs assessment.
- Define clear criteria for when to automate assistance or facilitate direct contact with staff.
