

Simplifying Patient Experience by Connecting Patients, Doctors & Researchers

Chronic Illness Can Be Depressing

Most **chronically ill patients** feel **confused, isolated & helpless** due to their chronic disease. **Risk of depression** and **more chronic diseases** in turn **increases**.

Triage focuses on **designing & prototyping a patient based web application** to facilitate the networking of patients to a supportive community.

Our Process: Design & Prototype

Conducted **usability surveys** with chronic patients. Held **interviews** with healthcare professionals & medical researchers, at Group Health and UW Medicine to create the design & prototype.
