**Problem**
Research scientists need to stay up-to-date on advancements in their field.
- Not enough time
- Too much information
- High level of effort

**Information Need**
- Relevant publications
- Potential collaborators and competitors
- Funding opportunities

**Solution**
Connected to Research is a personalized web portal which delivers relevant publications, potential collaborators, and funding opportunities. A user experience design and storyboard was created to meet the core information needs of research scientists. Connected to Research learns the research scientist’s interests, eliminates searching, reduces effort, and automatically provides information when needed.

**Approach**
- Interview research scientists
- Determine information needs
- Document findings
- Collaborate with design team
- Create storyboard
- Gather researcher feedback
- Create final storyboard

- **Publications** continuously delivers recent, relevant papers. Users can mark publications for later reading, apply filters, and save references to a bibliographic management tool.
- **Funding** provides highly relevant calls for proposals, request for information, funding cycles, and agencies.
- **People** delivers potential collaborators or competitors in their field. It sends information about an individual including their institution, job title, digital identifier (e.g., ORCID), recent publications, h-index, keywords, and social media handles.

**Acknowledgements:** Special thanks to the Pacific Northwest National Laboratory research scientists for their time and input on their information needs and information seeking behavior, the Visual Analytics staff for their mentorship and expertise in the user-design of the information portal, and the Chief Information Technology Manager, Technical Library Director and staff, and the U.S. Department of Energy for their financial support for this project. I would also like to express my sincere gratitude to the professors and teaching assistants at the School at the University of Washington for this learning opportunity and guidance throughout this project.
