

# Seattle Theatre During World War I

A digital exhibition of Seattle theatre history

## Problem

Create a prototype digital exhibit highlighting themes in Seattle theatre during the World War I period.

The exhibit should supply context to certain aspects of the collection and give the user a richer research experience.

## Process

After familiarization with the collection, three themes were chosen to research. Essays were planned and written connecting certain aspects of the collection to the wider historical context of WWI and Seattle's history.

## Outcome

Created a prototype exhibit page on ESTHP's website. The page contains three themes each with an essay and visual materials from the collection. A bibliography accompanies each theme essay to help the user jumpstart and expand their own research.
