Maximize productivity with AI

We sought out to make scheduling approachable. We wanted to decrease the amount of work to organize what you need to do and how to make sure you get the most value out of your time.

Project Abstract

Problem

How do we make scheduling one's life easier and more approachable?

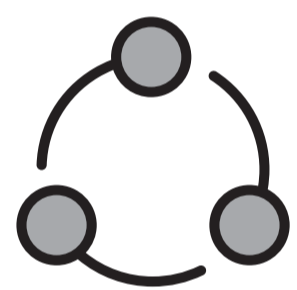

Solution

Using AI to streamline scheduling your tasks, so you spend more time doing and less time scheduling.

53% of people we surveyed do not use a digital method of planning

70% of people we surveyed are interested in trying our solution

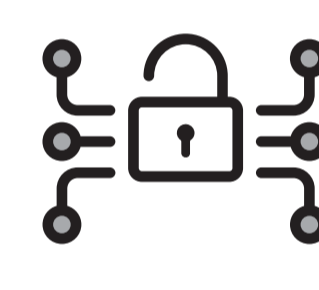

Features

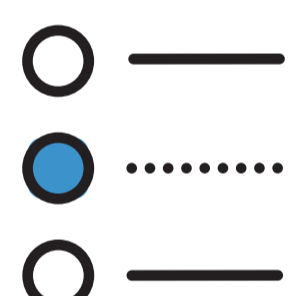

Auto-Schedule
the task to be completed at the best time available

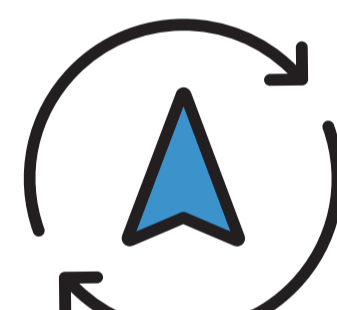

Reminders
make sure you stay on task

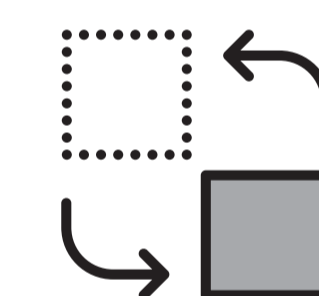

Google's Security
standards for your data

Smart Planning
that records how long it takes to complete things

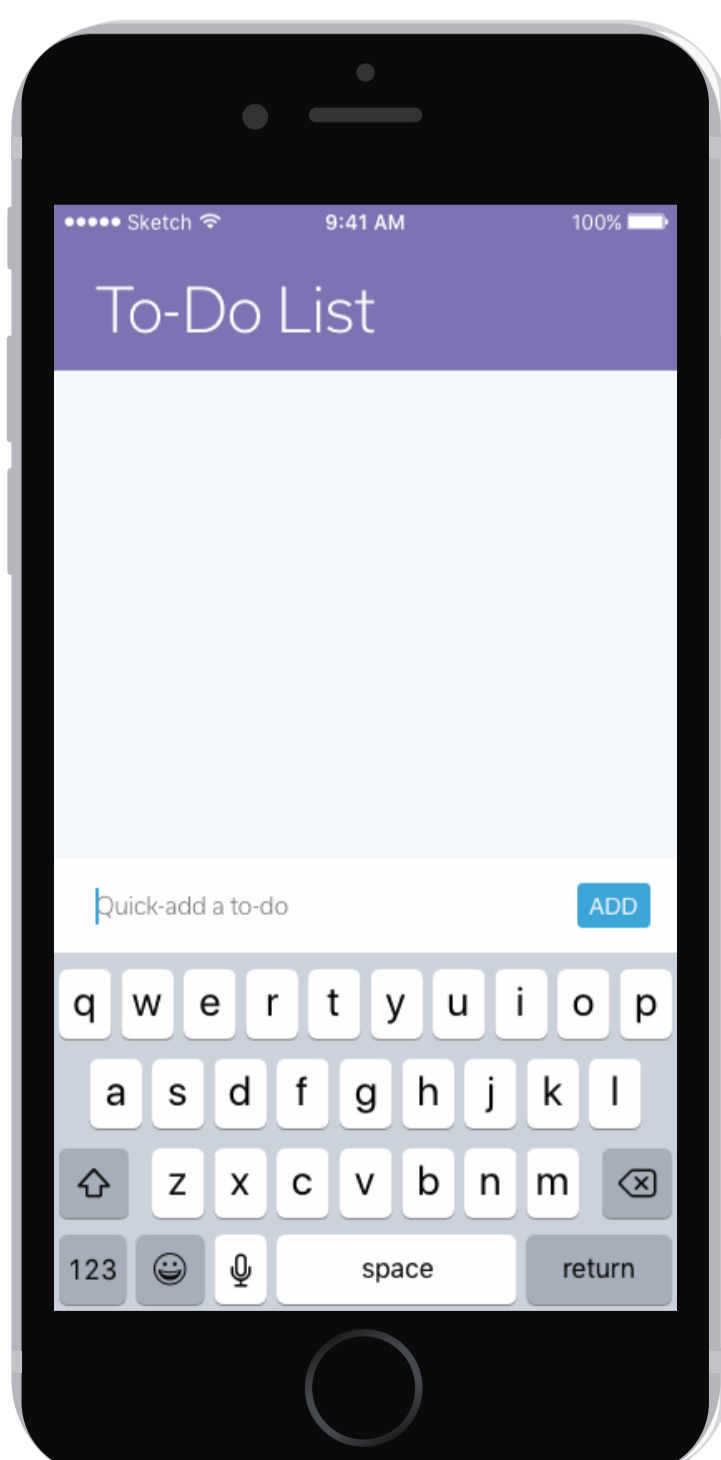

Geo-Location
aware and groups tasks by their shortest paths

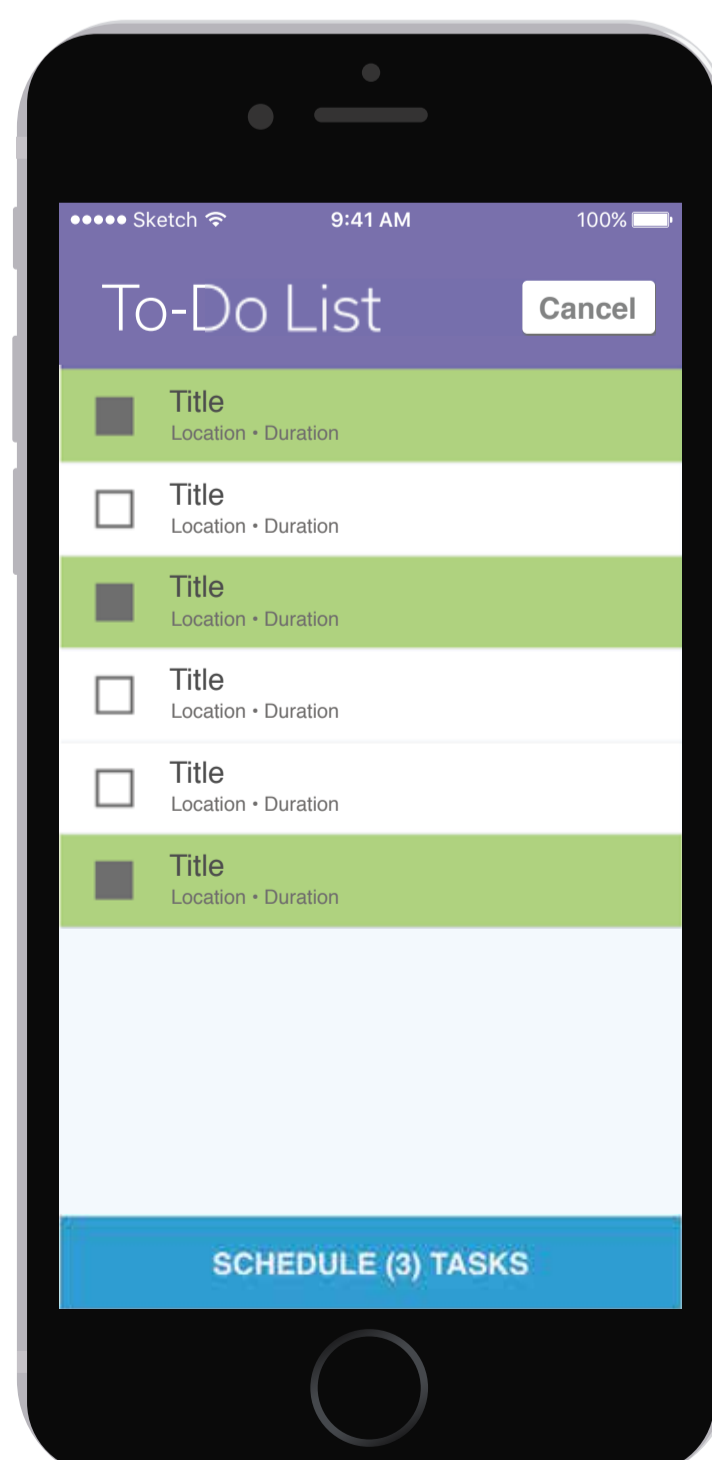

Easy interface
for scheduling and moving tasks
