

KITSAP REGIONAL

Library

Defining and Documenting the Kitsap Regional Library Collection

Issue

Staff have been adding materials for a long time without any parameters. They don't know what they have, why they have it, or whether to keep it.

Process

We reviewed collection holdings, existing tools, and talked with stakeholders to figure out how to define the collection and what would make it easy to use.

Outcomes

A collection policy, inventory and assessment tool, and finding aid to define, describe, and continue processing the collection.

Impact

Staff will be able to identify, locate, and use materials from, and feel comfortable adding materials to, the Kitsap Regional Library Collection.
