

University of Washington Press -Physical Archives-

Introduction

- Of the thousands of titles published by the Press, only 1,400 are available through e-book.
- There are more than 3,000 backlist titles that have yet to be digitized.
- This project prepared the backlist titles for digitization.

Methodology

Results

- A clean and streamlined archive.
- Revenue for the Press through book sales.
- A complete record of all books owned by the Press.

Impact

- Previously print-only books will now be available to readers and libraries through digitization.
- The Allbooks cataloging software is better suited to handle future additions, and is currently more up to date.
