point

Problem Statement
How do we create an educational tool so that children and childcare practitioners can communicate with each other in a broad range of environments?

Point
is a free Android application that provides children with access to a large set of vocabulary in a straightforward way.
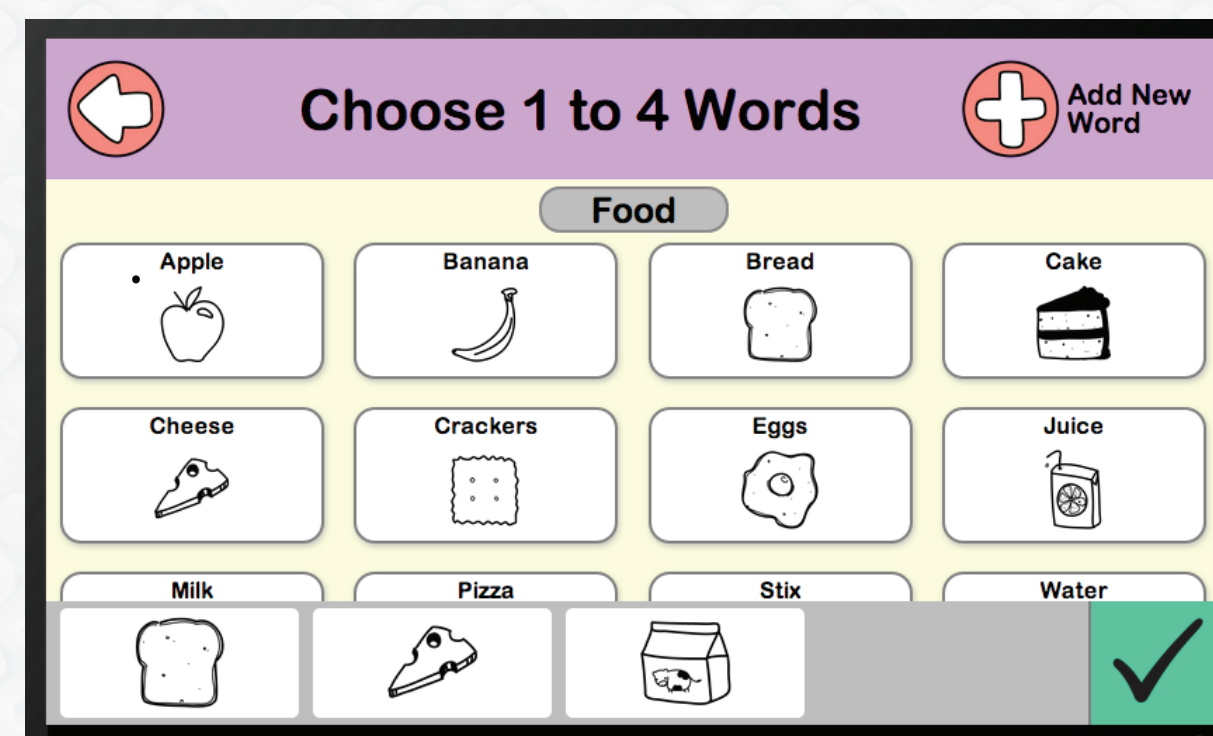

how it's used

### ① Choose a category
It's time for Lily to eat food.

Choose a Category
Add New Category
All Categories
Expressions | Help | Answers | Like
Places | Greetings | Activities | Feelings
Personal | Food | Colors | Shapes

② Select options
We only have bananas, cheese, and crackers.

Choose 1 to 4 Words
Add New Word
Food
Apple | Banana | Bread | Cake
Cheese | Crackers | Eggs | Juice
Milk | Pizza | Stix | Water

③ Present to child for choice
Lily, what do you want?

CHEESE

Ready-To-Go
Pre-packaged with over 100 words

Line Drawings

Pre-recorded voices

Customizable
Add new categories and words
- Choose name
- Add recording
- Take photo

Order them how you want

Save commonly used pages

Accessible
Point is free on the Android Market while other Educational software is limited and expensive.

Point is one of the few applications that focuses on children's first words

Pointing children in the right direction.
