HOW IT WORKS

GAMIFIED LEARNING

Gamified learning experience. Opportunity to test your knowledge and skills.

GET FEEDBACK

Comprehensive and professional feedback from our team of industry professionals.

GET JOBS

Own technical interviews. Learn industry best practices for code!

OUR MISSION

Technology is increasingly becoming more integrated into our everyday lives. At Exception Null, we believe that being able to write good code should be a skill everyone should have a chance to develop. That is why we built our platform.

When you subscribe to our service, you not only unlock features that elevate your learning experience, but you will also be providing an opportunity for someone else less fortunate to learn to code. Helping engineers improve is great. Allowing everyone the opportunity to shine is even better. We encounter people with brilliant ideas everyday and we want to help them achieve their dreams in search of that better tomorrow for all.

Using industry best practices to improve coding skills and create opportunities for others to learn to code.
