

## WHO WE ARE

Devour embraces and understands the importance of personalization, especially when it comes to recipes, social events, and budgeting. We account for every personal detail to assure we are working within the bounds of one's lifestyle, not changing it.

### PLAN

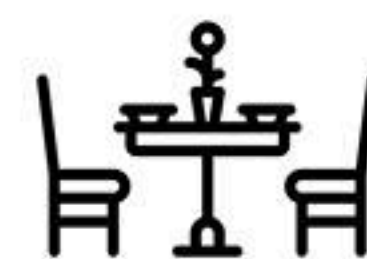

Utilizing the user's budget and favorite recipes, the planning tool creates a meal plan for the week. Users also receive notifications when it is "Time to start cooking!" This is calculated based on the time the recipes takes to cook, and the time the user designates as time to eat.

### BUDGET

Users receive recipe recommendations based on their weekly or monthly budget. After selecting the perfect recipe, a user can see the total price to cook a dish using ingredients from their local or preferred grocery store.

### SOCIALIZE

Users can create an event and "invite" guests to find a recipe everyone will love. Each guest's health preferences, allergies, and goals are taken into account when forming the perfect recipe. This ensures everyone at the table is always eating something they'll enjoy.

## WHY US?

We don't just care about you, we care about everyone you care about. We know that some days, you'll eat alone - and we'll provide the perfect recipe or restaurant for you to enjoy that meal. But we also know that you go out or eat at home with your friends, and that everyone should enjoy their perfect meal, together. And simply put, there is no application that will provide users the benefit of personalized meals so that every individual in the group enjoys what they are eating.
