Hotel Management System

## By Team Unicorn

Before HMS

- 77 percent* small-and-medium hotels use manual methods

- Error-prone and revenue losing

After HMS

- Front desk operations
- Booking Engine
- automation and convenience
- Reduce risks of errors
- no more post-its
- Safe information storage

Key Features

Make reservations at anytime

Revenue reports

Manage Payment online

Fast house-keeping arrangement

User-friendly and easy-to-learn interface

Other customizable features

Entity Relational Database

Web Server

```
byte[] = (new Date())...
long t2 = Math.random();
double q2 = Math.random();
byte[] protected2 = Protection...
out.writeUTF(user);
out.writeInt(protected1.length)
out.write(protected2);
out.flush();
}

public static void main(St
string host = args[0];
