

Virtual Hearing Screening

37.5

million adults report trouble with hearing

466

million adults diagnosed with hearing loss

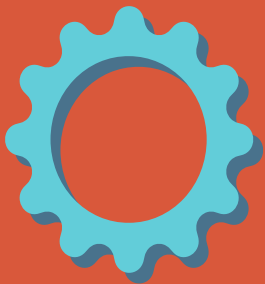

7

years on average people go without diagnosed hearing loss

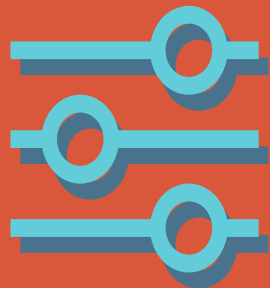

“Our mission is to improve hearing health for everyone by educating, engaging, and increasing screening access... for FREE”

It's as simple as...

1. Set up

...a quiet environment and grab a pair of headphones

2. Calibrate

...by adjusting your device's volume to 50%

3. Listen

...to determine if you can hear the tones

4. Discover

...your hearing level and take your next steps
