

Revolutionizing the way you see history.

The Problem

How do we create an **interactive experience** that will enable all guests who visit a museum, from children to adults, to learn and become **immersed** with the art and artifacts that surround them?

The Solution

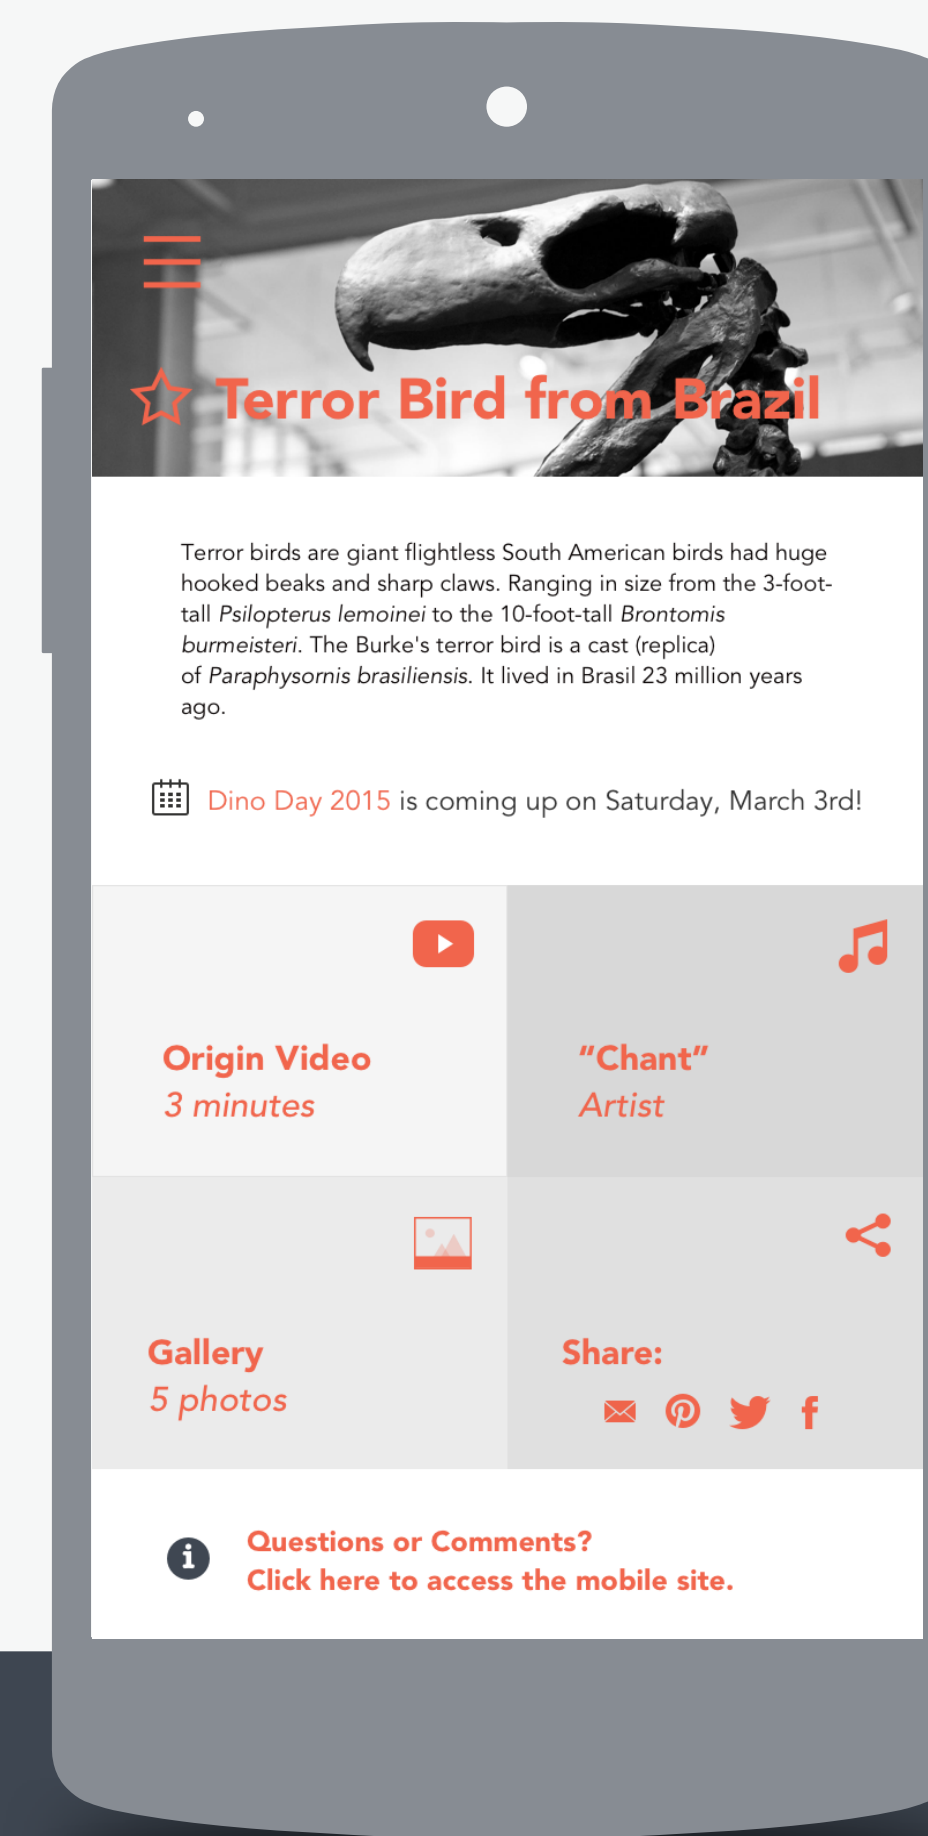

MuSee is **revolutionizing** the Burke Museum with an application that creates an **augmented reality** experience, allowing guests to **engage and interact** with artifacts in ways they never believed were possible.

1. POINT

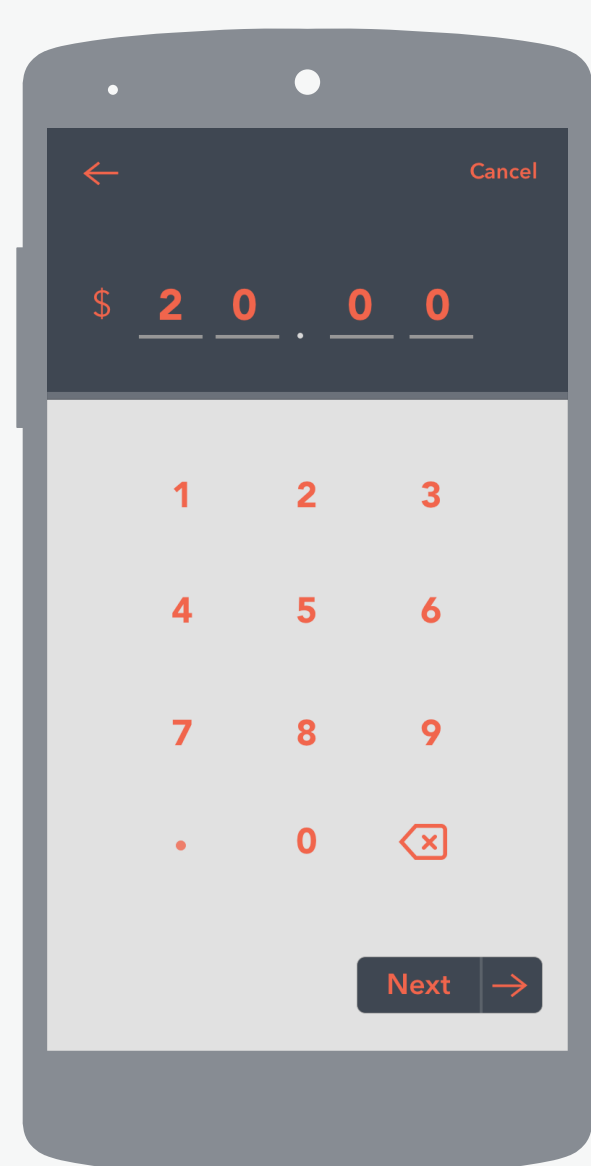

2. TAP

3. EXPLORE
