

Disinfectant Generator Dashboard

Performance Metrics

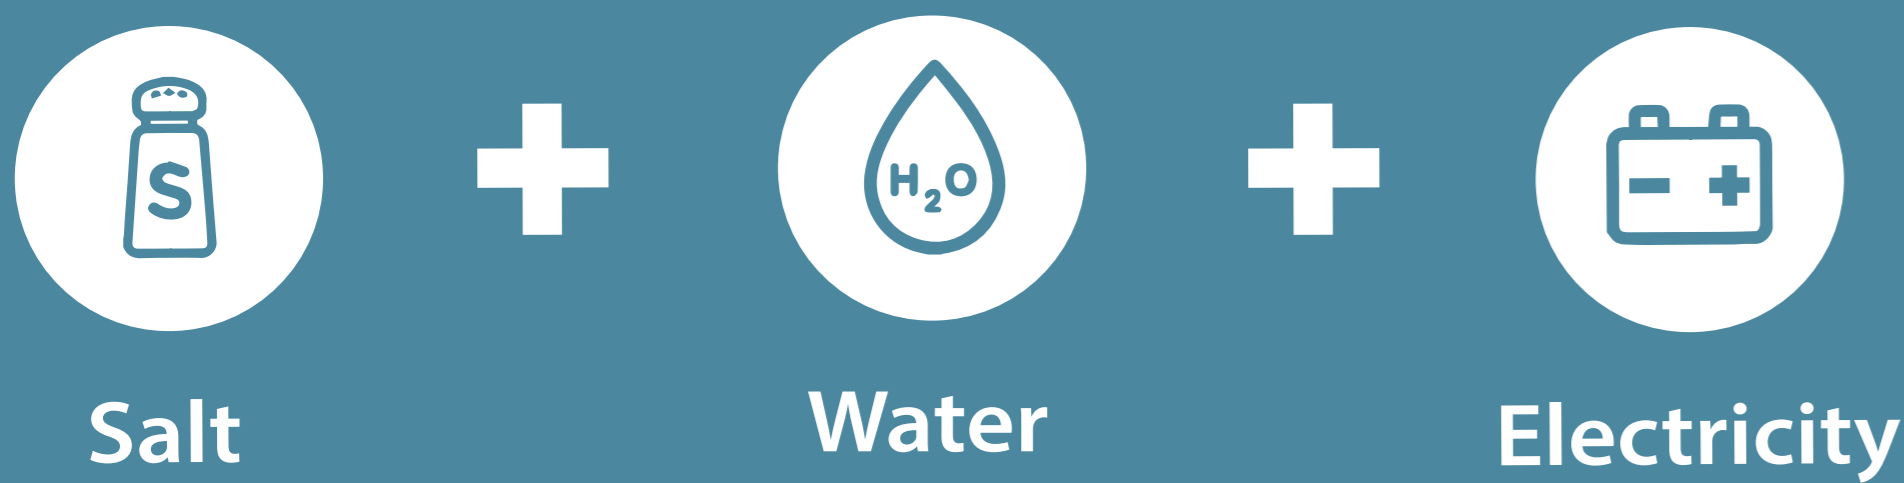

In 2015, unsanitary hospital conditions **killed 2.7 million newborns** in low-income countries

Chlorine is a highly effective disinfectant used for **infection prevention** in healthcare

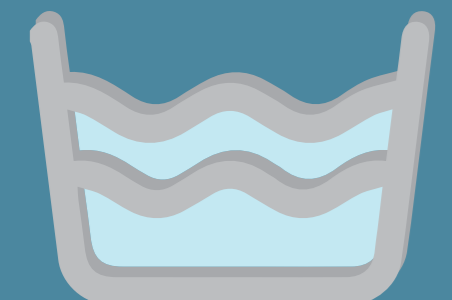

Low-resource healthcare facilities face **challenges with chlorine access, availability, and cost**

SafiStation™

An innovative new disinfectant generator by PATH and MSR that produces chlorine on-site

Chlorine

Chlorine Disinfectant Solution = Sanitized Water

Safe, clean & hygienic medical environments

How can PATH and MSR **remotely monitor the performance** of the SafiStations?

DATA TRANSMISSION

In Autumn 2018, **50** SafiStation Devices will be **field-tested in Africa**

Dashboard

Cloud-based, performance-tracking dashboard for SafiStation devices. Allows PATH and MSR to:

- Work With Real-time Data
- Monitor Key Metrics
- Pinpoint Errors
- Improve Device Performance
- Share Results w/Stakeholders
