

Find parking faster through predictive technology

Gradient shows predictions on parking availability through color-highlighted streets on the map, and drivers help each other by rating the availability.

Learn how it works

Find parking near you

Rate the availability

Simple

The UI provides only the key information necessary, minimizing distractions while streamlining the parking experience.

Data-Driven

Our machine learning model uses civic parking records, paired with real-time user feedback to provide reliable, dynamic predictions on parking.

Eco-Friendly

With world temperatures rising and almost 10,000 gallons of gas wasted on idling per year, finding parking efficiently benefits everyone.
