

AUTOMATED DATA ANALYSIS FRAMEWORK

OUR MISSION

TO HELP FINANCIAL SERVICES FOR POOR TEAM IMPROVE SURVEY DATA ANALYSIS EFFICIENCY

THE FINANCIAL SERVICES FOR POOR TEAM

Expand the reach of digital financial infrastructure

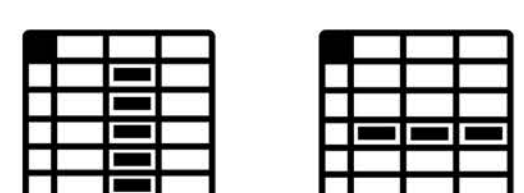

Encourage poor people to join digital financial systems & help them manage their financial lives

Adapt regulations to help the poor people open accounts & to protect the users

Fewer people fall into poverty and more people move out of poverty faster

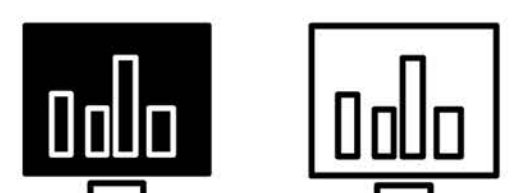

PROBLEM

Survey data sets

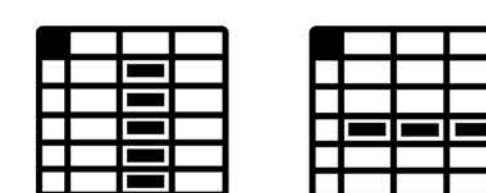

Manual feature selection & data quality control

Inconsistent reports

Overall time consuming process with heavy involvement of manual work for data quality checking and analysis

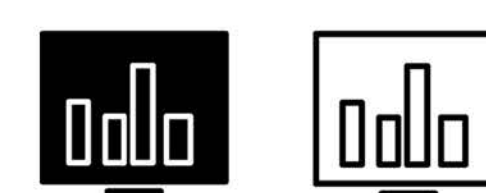

SOLUTION

Survey data sets

Automated scripts with machine learning logic to perform data quality control, perform analysis & produce reports

Consistent & accurate reports

Improved analysis efficiency & consistent and accurate reports over time with more room to focus on interpretation of results than the process of producing them
