Mission

Impuls is a map based event location service that strives to provide user with all the information they need in order to find local events quickly, efficiently, and at a moment's notice!

You shouldn't have to scour endless venue websites to find local events.

You shouldn't have to spend hours trying to plan a simple outing.

You're too busy to be thinking about what you're going to do days in advance.
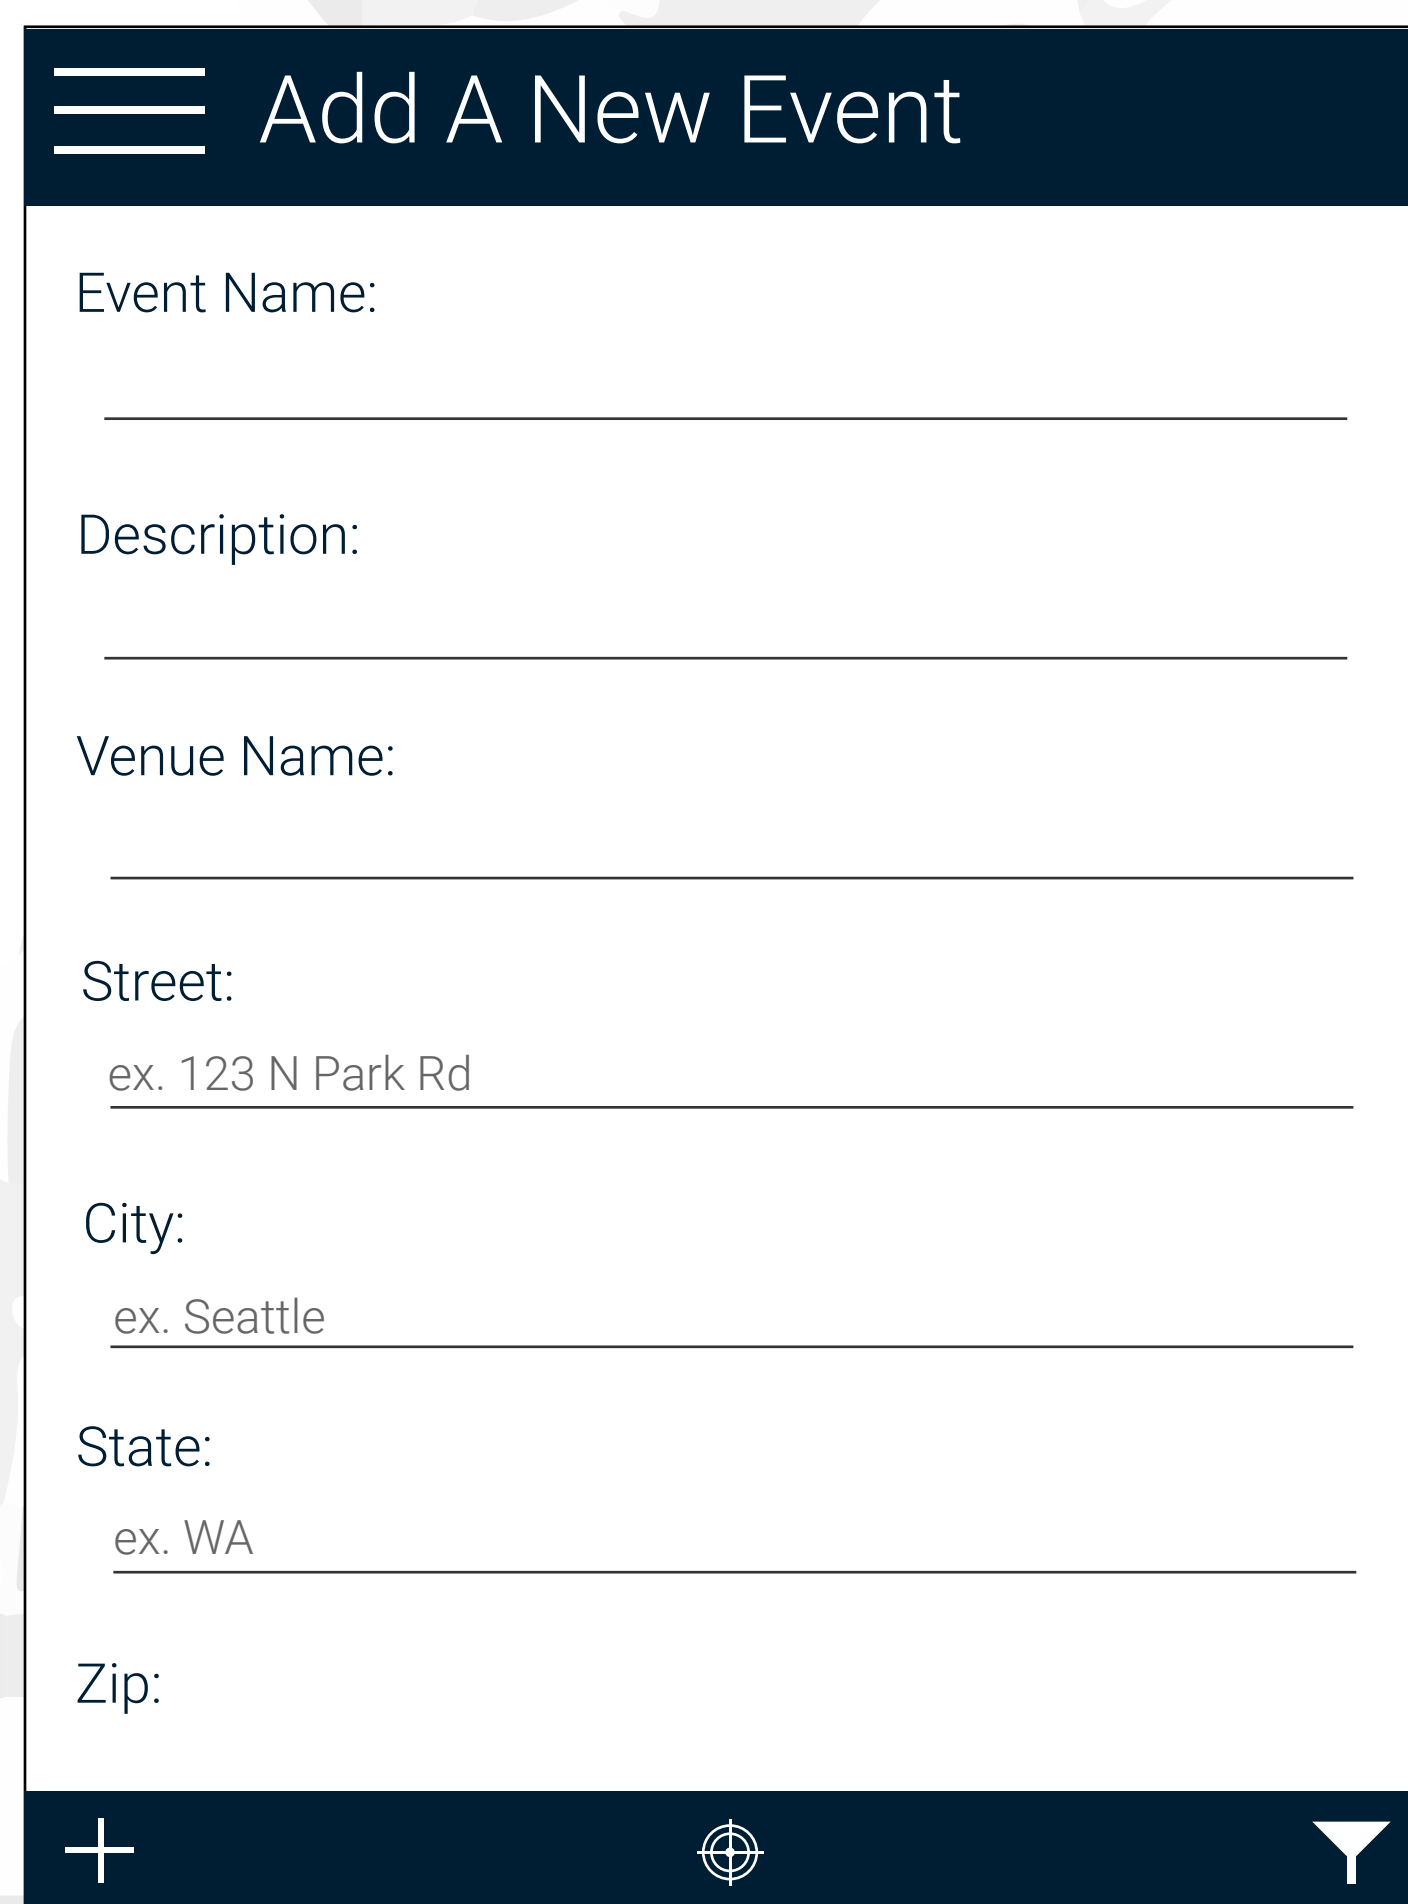

Functionality

Map of events

Utilizes iconography to inform users of event types

Utilizes color to indicate relative immediacy of the event

Add your own events

Add events to the map fast and with ease

Stores past events for the user who promotes multiple events with similar properties

Filter the map

Quickly filter out event that don't meet your criteria

Filters can be saved for quick access for a variety of situations

available platforms **Android & Web**
