

# WARUC

WASHINGTON ROAD USAGE CHARGE

Bringing our transportation budget up-to-speed with modern vehicles.

## PROBLEM

Gas taxes make up nearly 60 percent of Washington State's Transportation Infrastructure Budget.

Projected nearly 50% reduction in revenue by 2035 due to fuel efficient or hybrid/ electric vehicles.

Driver contributions to the infrastructure budget vary widely depending on vehicle fuel efficiency

## SOLUTION

Utilizing modern Bluetooth and OBD-II technology, our iOS application can unobtrusively record mileage information.

Easily deployable, scalable, and adaptable, we can help change the way drivers contribute to transportation infrastructure.

Account creation and vehicle recognition made simple to ensure that you get back on the road as quickly as possible.

Quick pairing and vehicle recognition

Uses a low-energy bluetooth connection to OBD-II to minimize battery consumption

Automatic Mileage Tracking

No location data recorded to ensure your privacy and security

Multiple vehicle mileage tracking.
