

VISION SCREENER

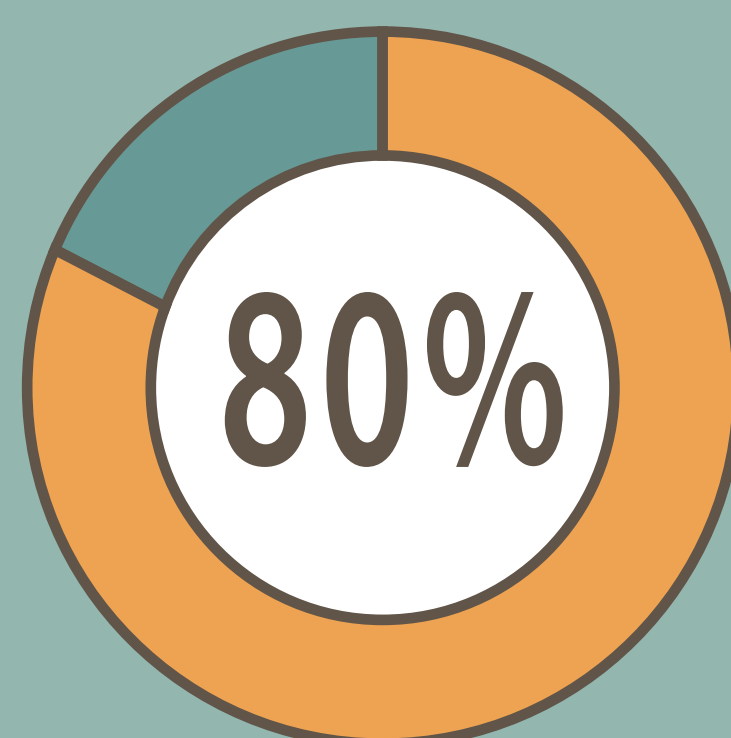

PROBLEM

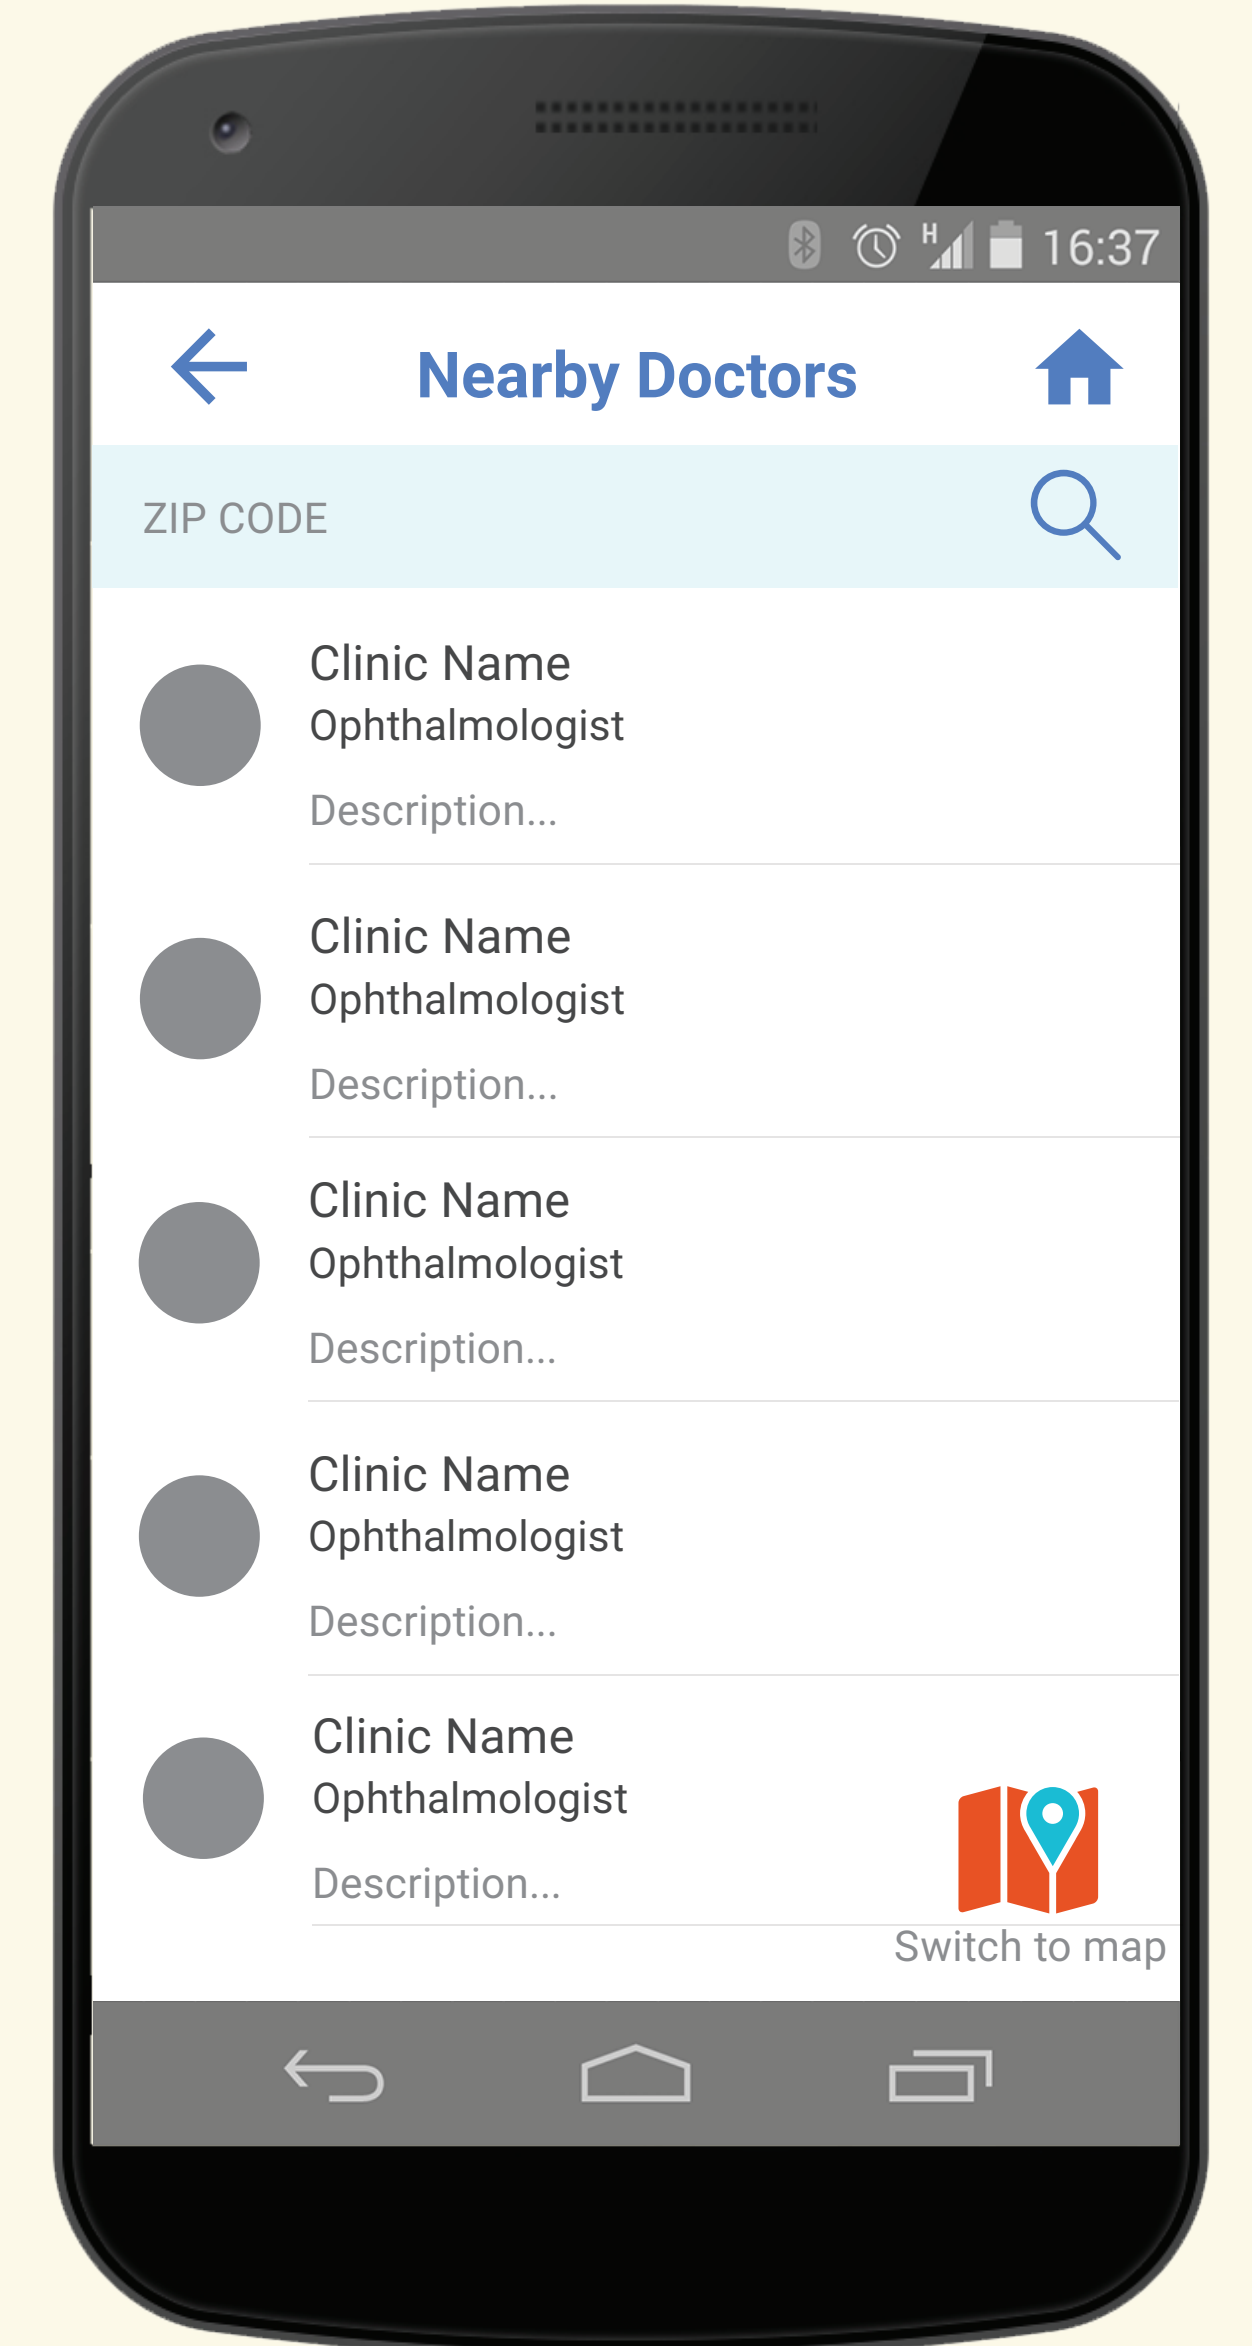

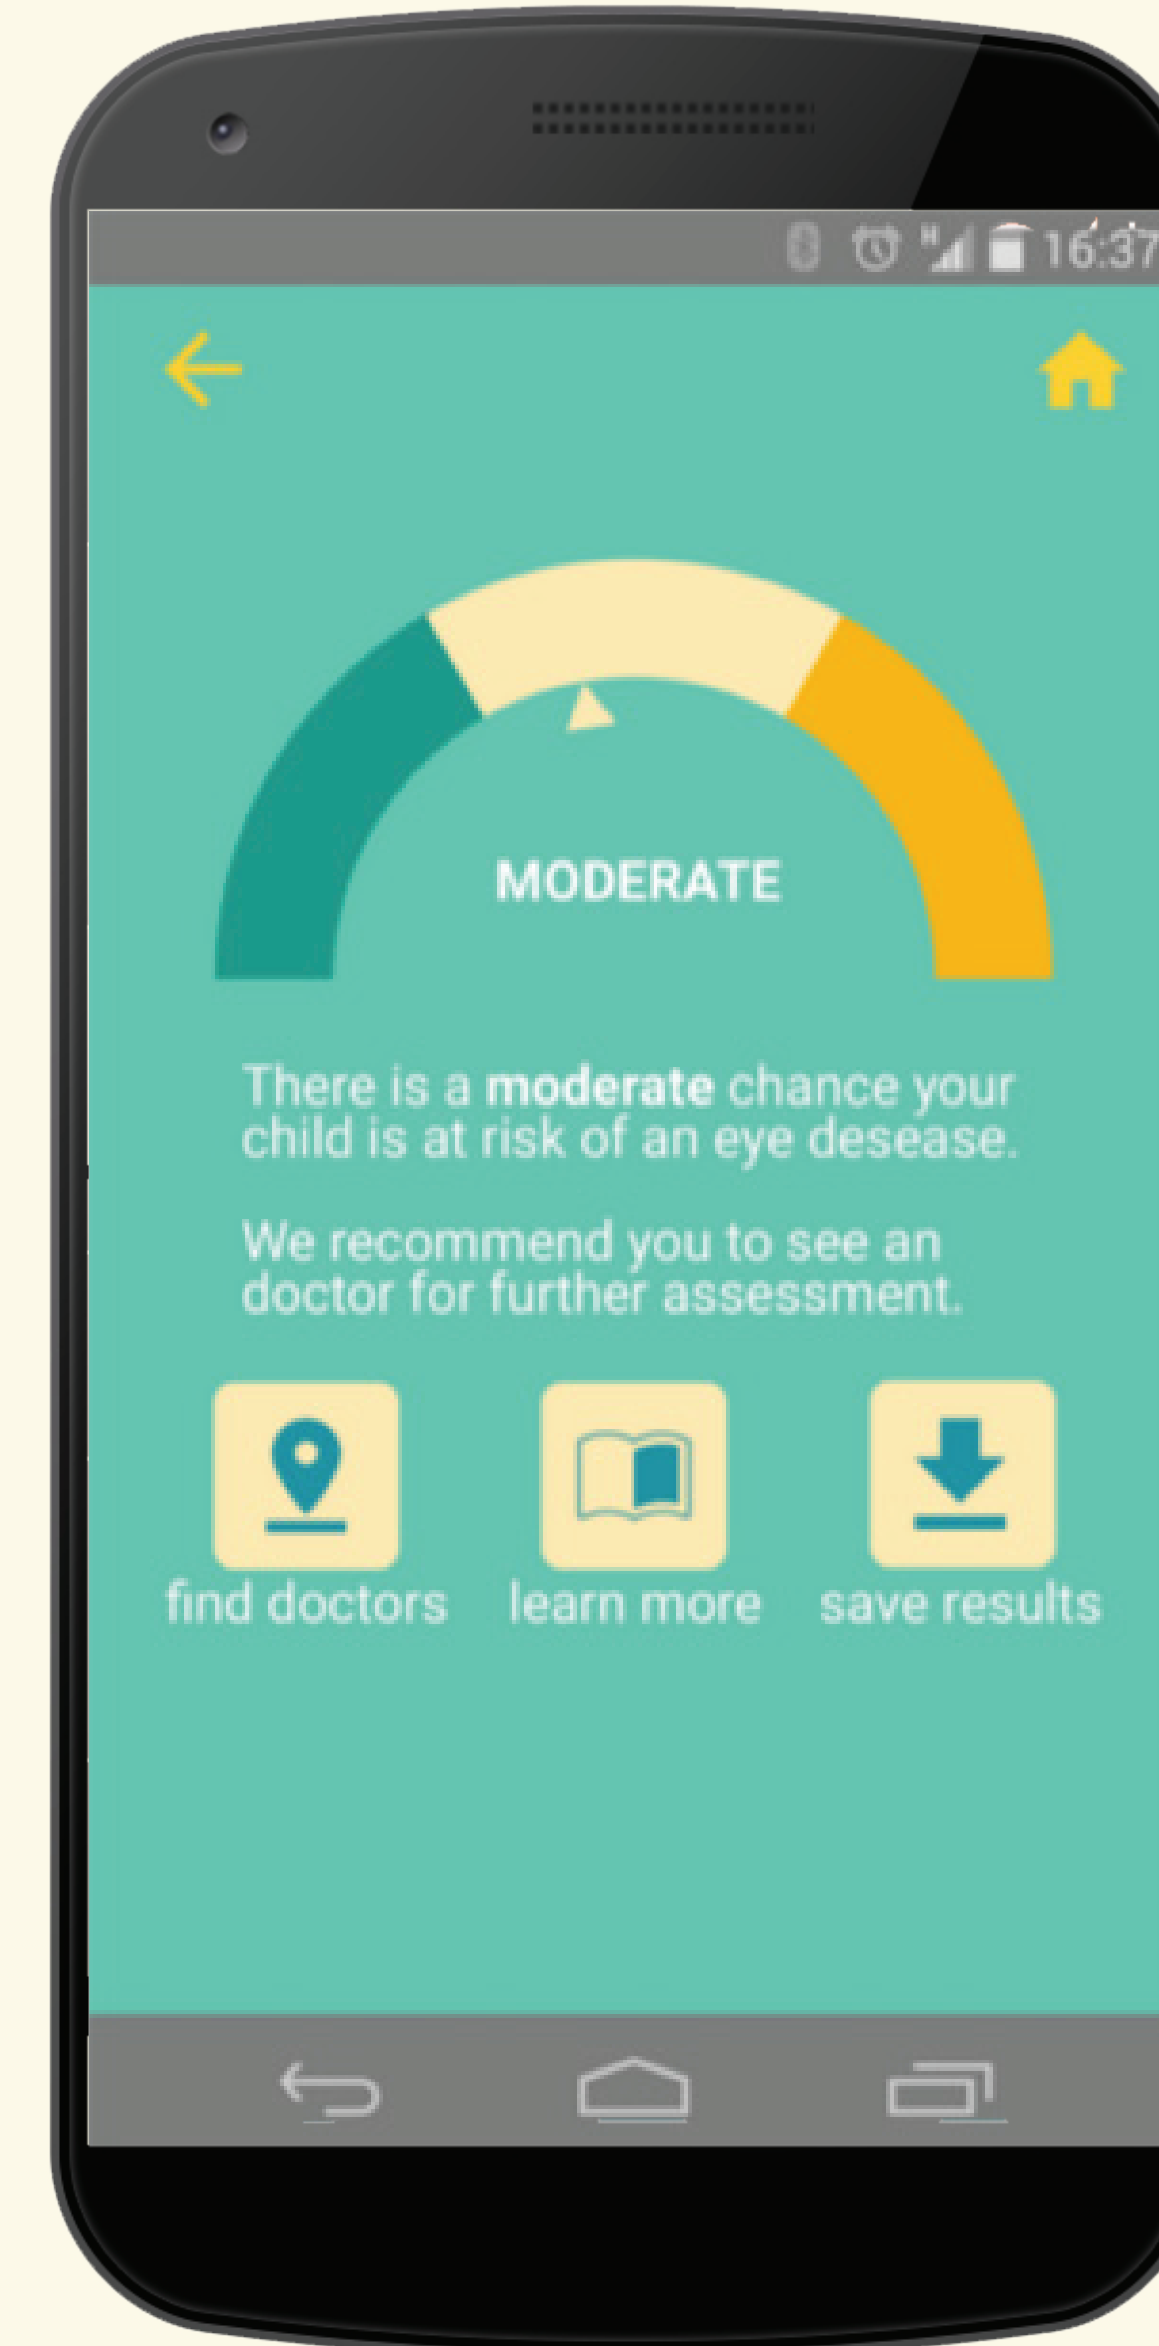

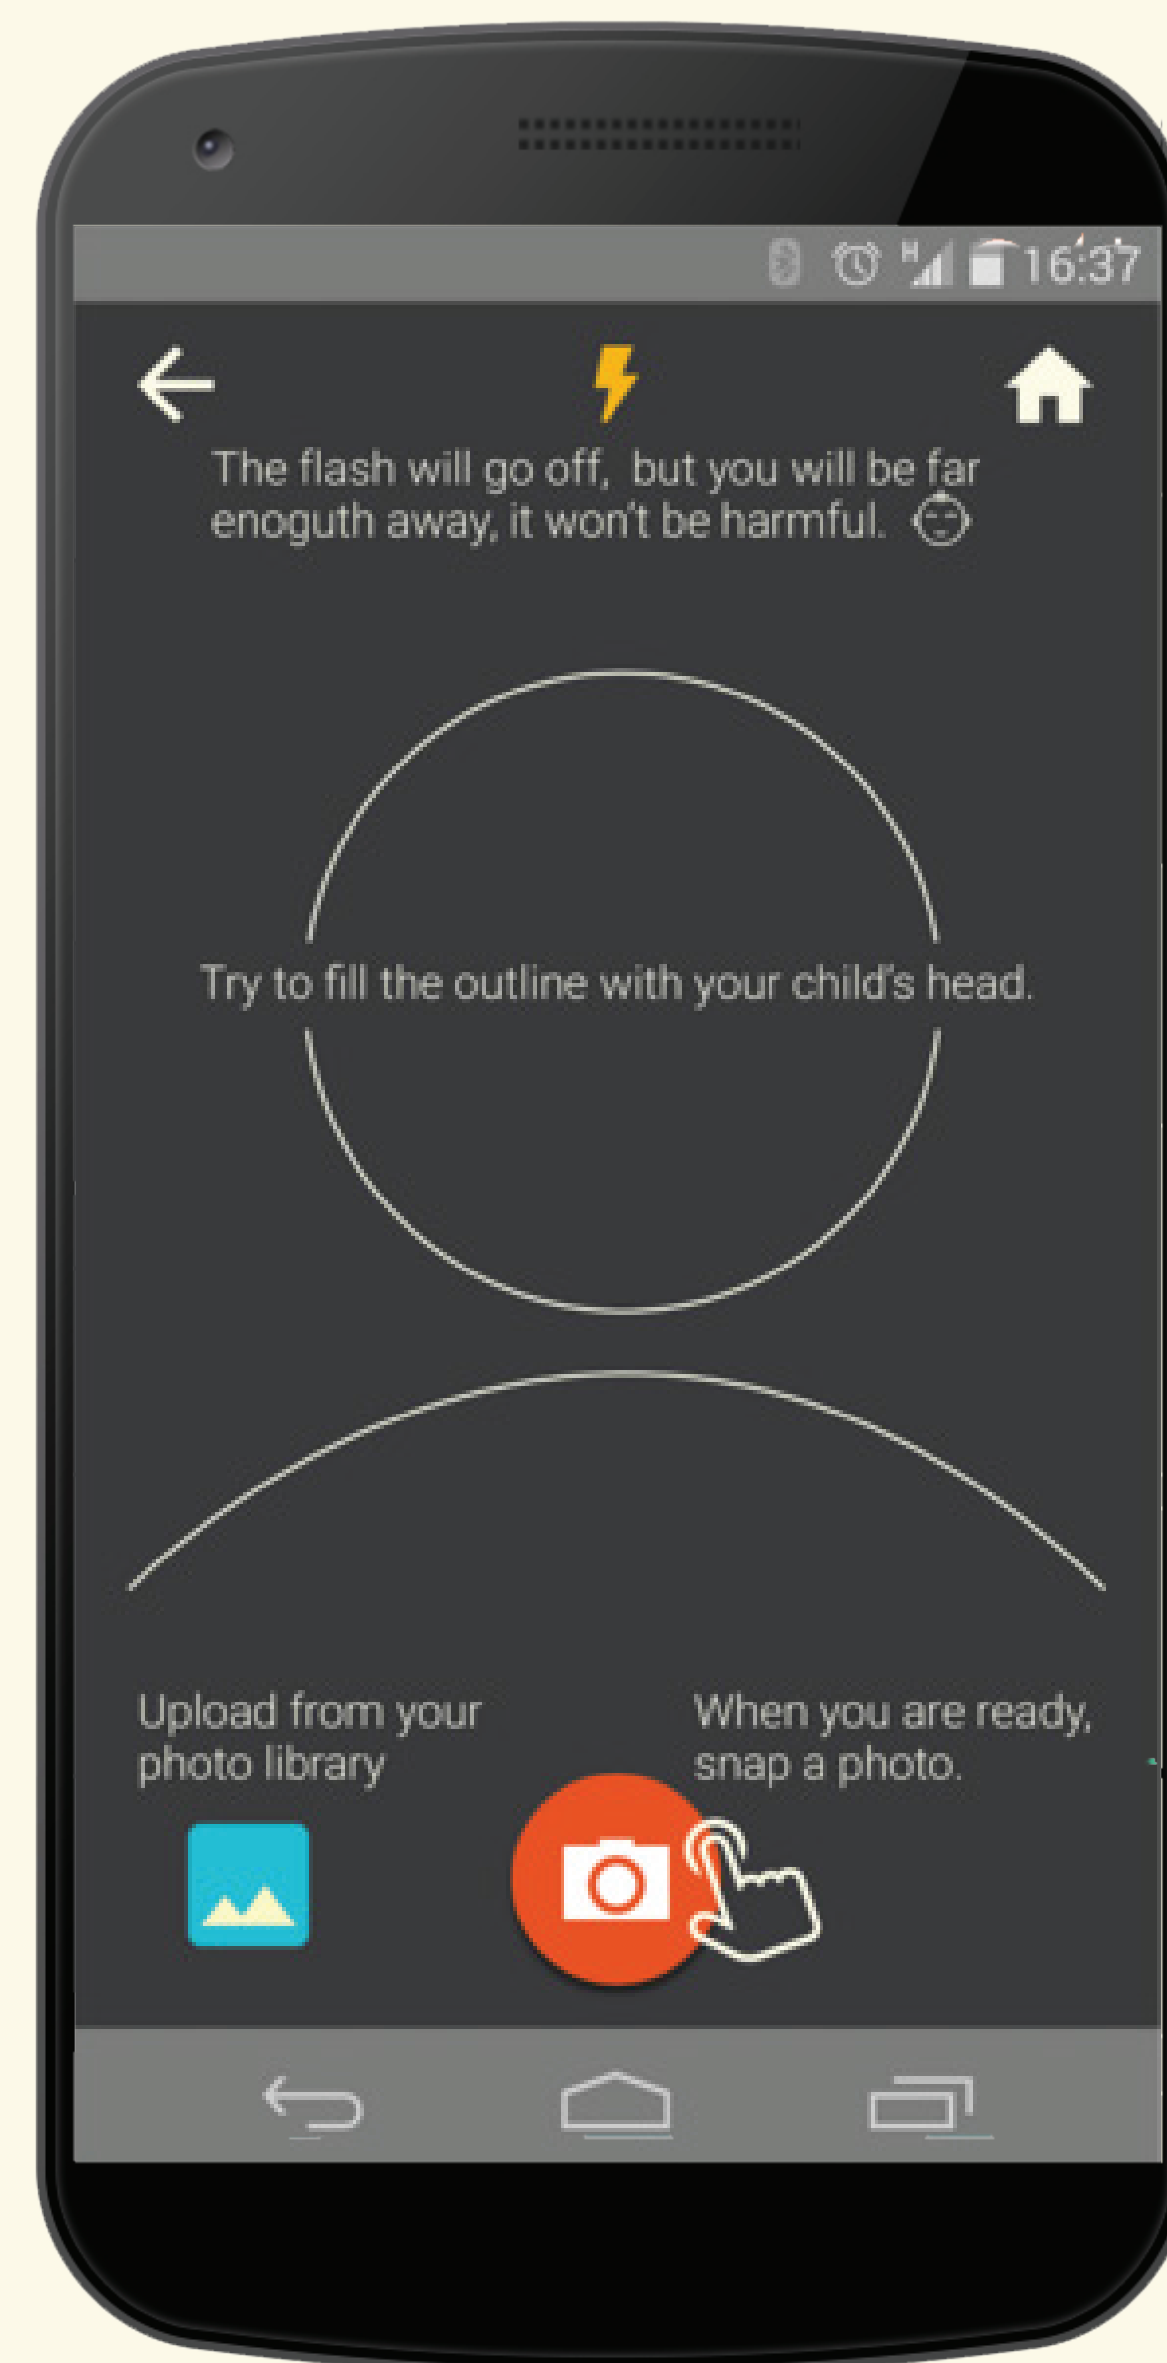

OF LEARNING IS
DONE THROUGH
A CHILD'S EYES

1 IN 4 CHILDREN
ARE AFFECTED
BY AN EYE
DISEASE

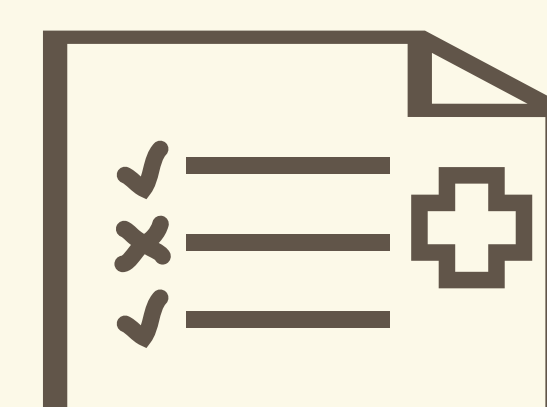

OF CASES CAN
BE REVERSED IF
DIAGNOSED AT
AN EARLY AGE

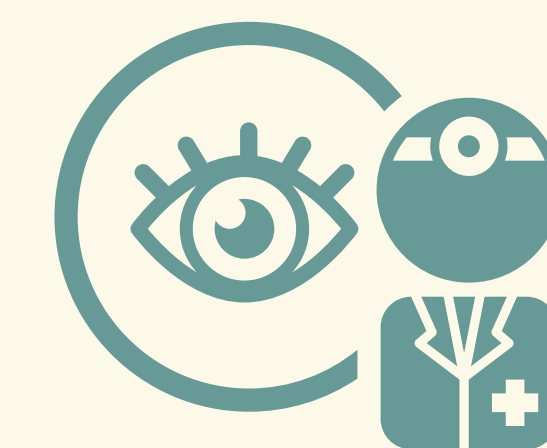

Vision Screener is an Android app designed to help parents determine if their child is at risk of eye disease. Parents simply take a picture of their child and the app analyzes it instantaneously. If results indicate a risk of disease, the app helps parents find a nearby eye care professional for further diagnosis.
