

The Challenge

Too Much Data

Large volumes of vulnerability information is published on a periodic basis

Lack of Context

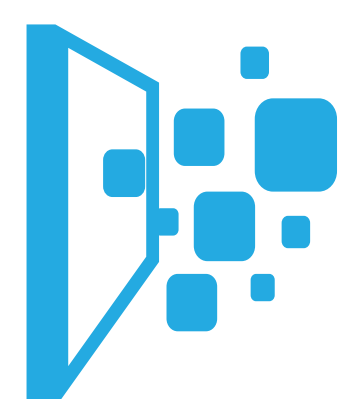

The vulnerability score does not consider company's information assets

Decision Delay

Inadequate information to identify and prioritize most serious risks, and allocate resources accordingly

The Spyral Difference

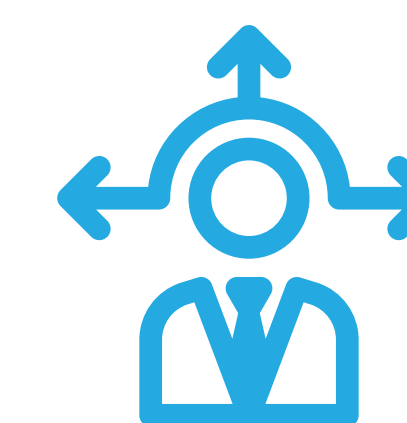

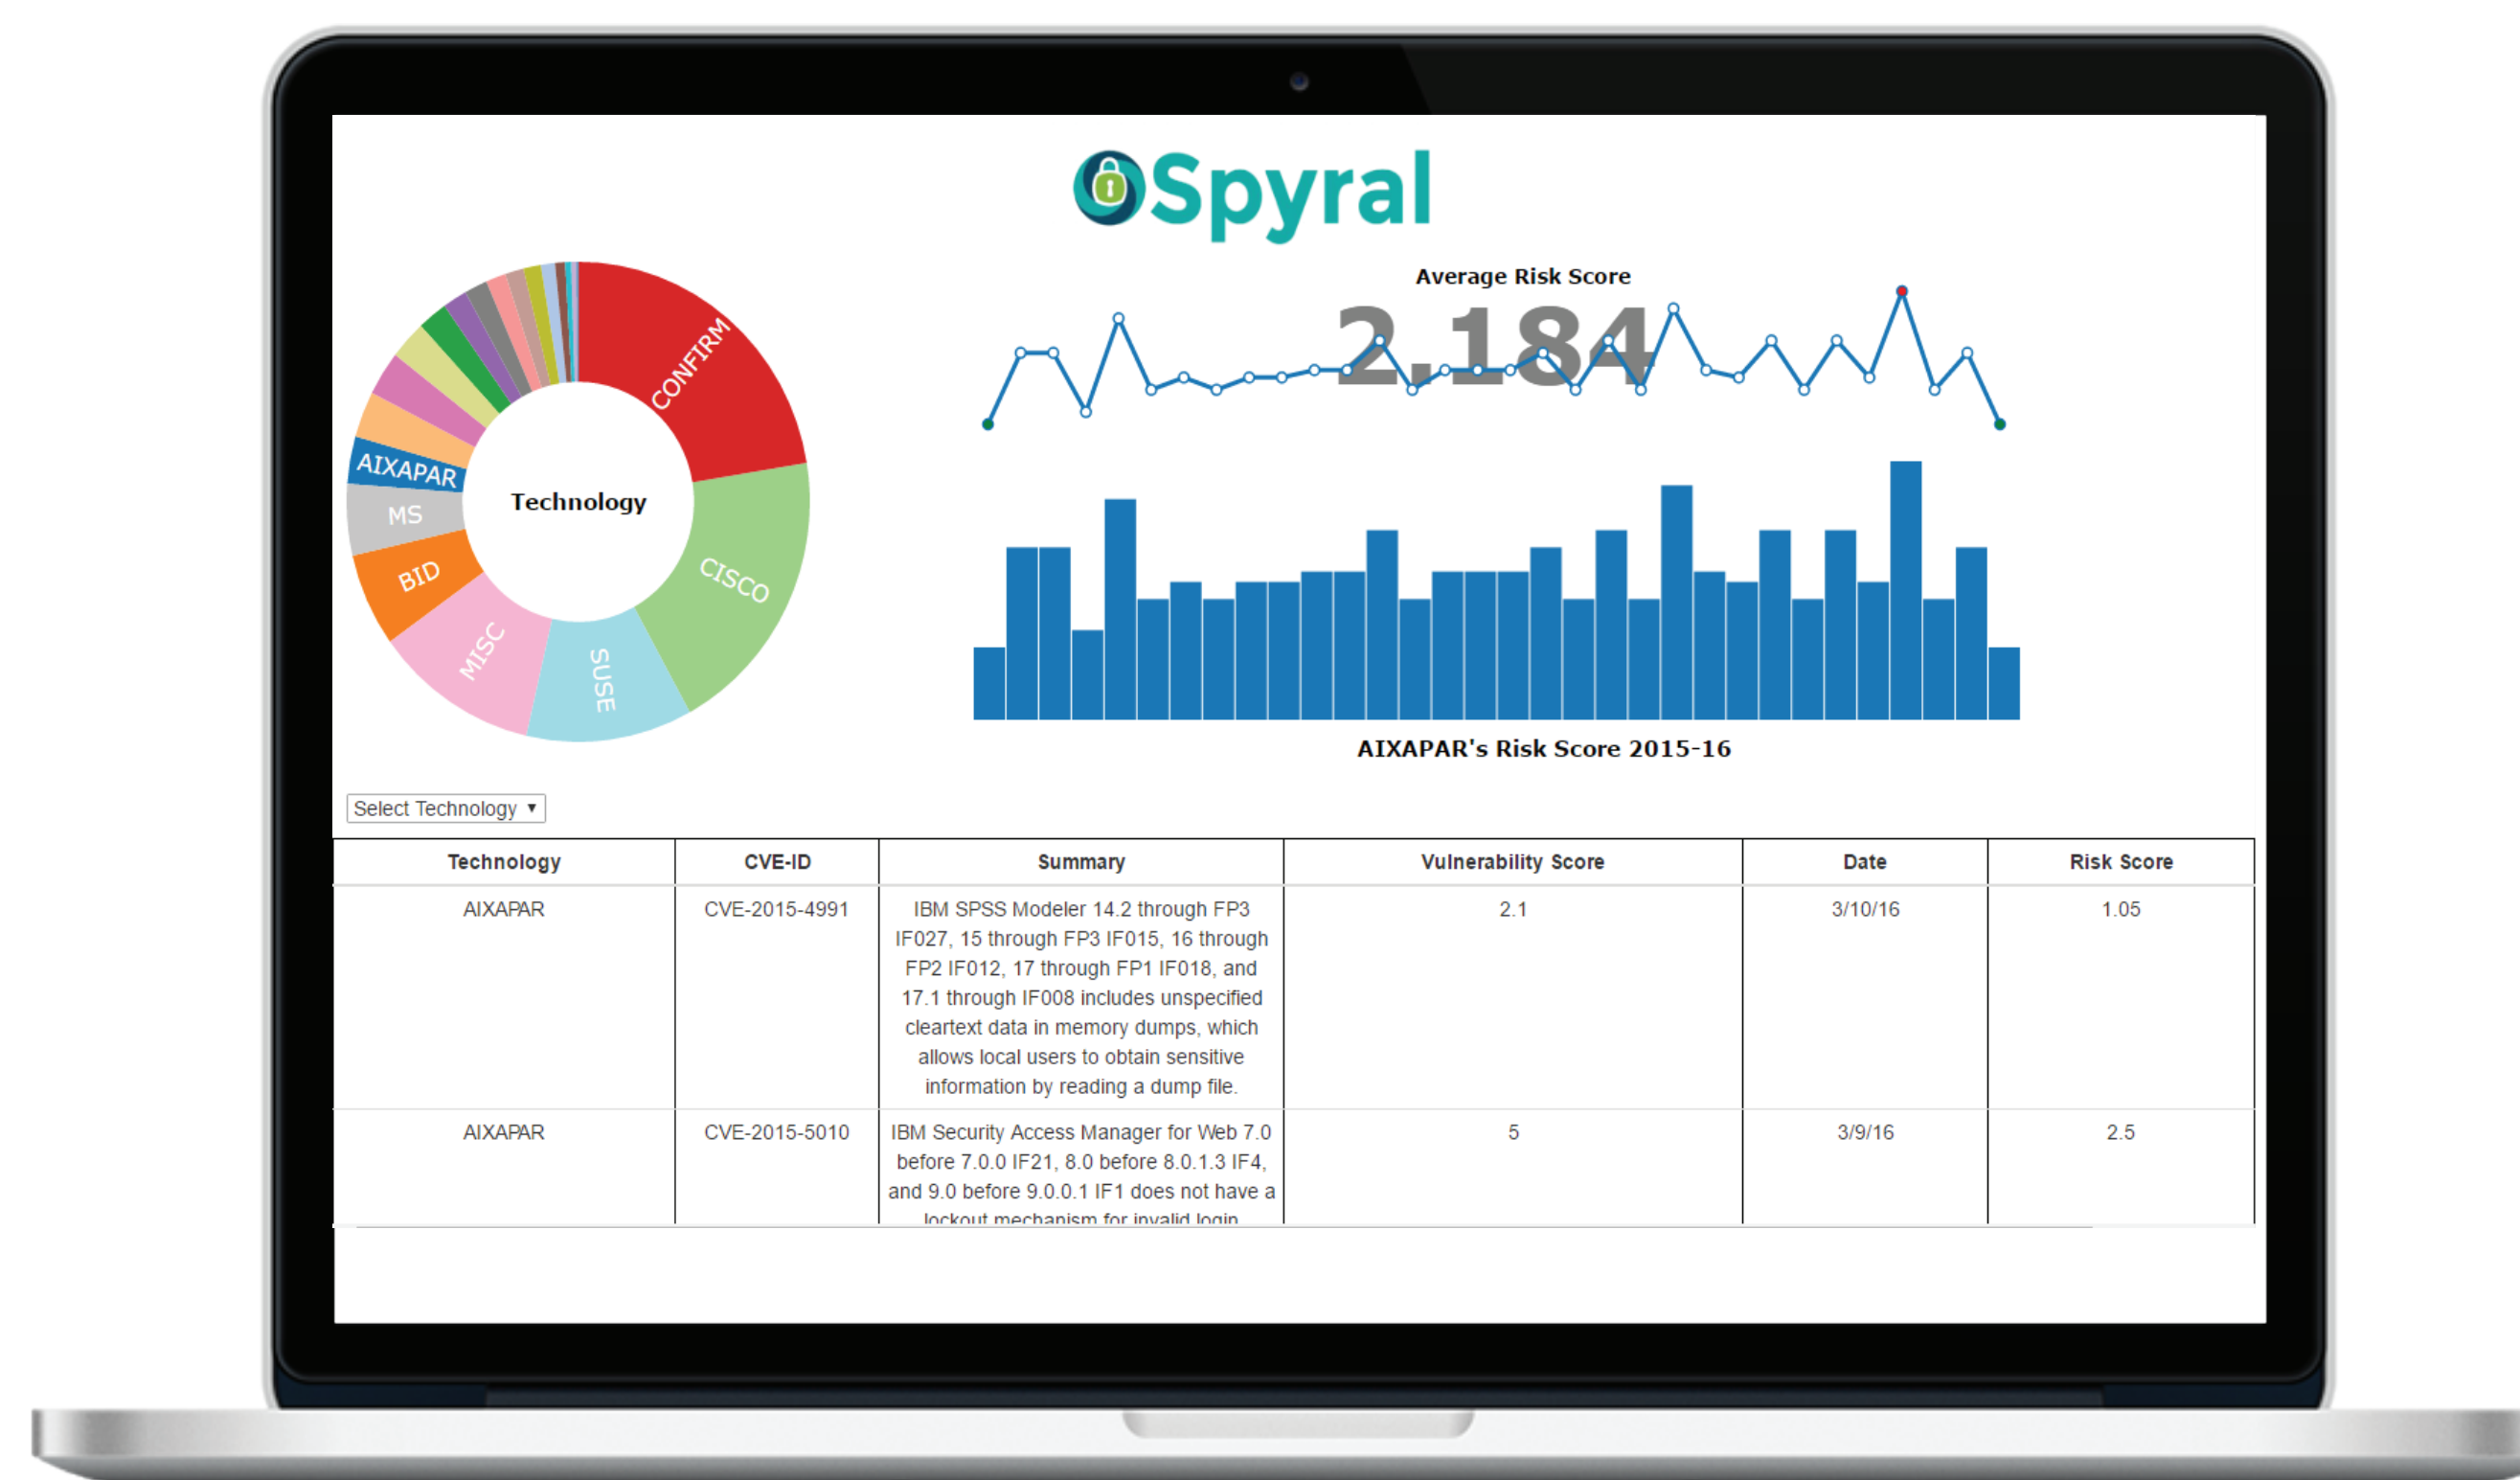

One-Stop Dashboard

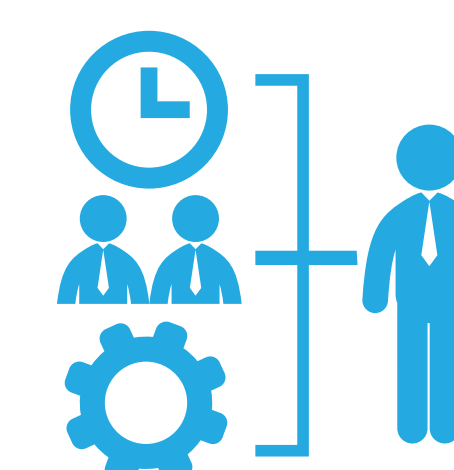

Prioritized Risks

Save Money

Actionable Business Intelligence

Better Resource Allocation

Gather Data From Veritable Sources

National Vulnerability Database

Spyral Risk Scoring

Configure Company Specific Information

Company's Operational Variables

How It Works?
