Check out iCareers
The iSchool hosts an online database where students can find the latest internship and job opportunities posted by companies and organizations.

Sign up for an internship or two
Internships allow you to apply concepts and practices learned in coursework as you assist in professional entry-level work under the formal guidance of a qualified supervisor/mentor. Students may receive job offers from the companies where they intern.

Strategically plan your Capstone project
The Capstone experience involves identifying an information problem in a real-world setting and developing the means to address it. Many students target companies or industries where they wish to work after graduation in order to gain relevant experience. Other students engage in a research-focused project, collaborating with faculty members or research-oriented organizations.

Attend iSchool Career Fair
The iSchool Career Fair is an annual event that focuses on career opportunities for iSchool graduate and undergraduate students and alumni. The UW also hosts career fairs of interest to iSchool students.

Network with alumni
Some of the iSchool student organizations organize alumni networking events hosted by graduates who work in local organizations. Many alumni maintain connections through social media groups and participate in receptions and other events sponsored by the iSchool and are open to helping fellow iSchoolers in their career search.

Develop your job search skills
Polish your professional skills by participating in a variety of workshops. Topics, such as creating a resume, writing a cover letter, mastering social media in the job search, and learning how to network, all aim to teach students how to stand out in the job search.

Meet with employers
Through information sessions or industry panels, students can interact with employers from a variety of local and national companies and organizations.

Recent graduates of the INFO program reported employment at 48 different organizations. Top employers of recent INFO grads include:
